Saigon Units Copter Out

Sepone Occupied By Hanoi Troops

SAIGON, March 14 (UPI) -- More than 1,500 North Vietnamese ops have moved back into the key Ro Chi Minh Trail town ops have moved back into the key Ho Chi Minh Trail town Sepone, in Laos, to repair damage caused by South Vietnamese ope and U.S. air strikes, American field officers said today. A full regiment of North Vietnamese moved into the town soon as the South Vietnamese vacated high points surround-it Friday, the officers said.

Spokesmen in Saigon said most of the South Vietnamese troops

o controlled Sepone for six days have moved farther south.

indoning their control of the town.

"We still have some troops in the vicinity of Sepone," spokesin in Salgon said today, but they refused to say where the reining troops were based, or in what numbers, for security reasons.

The South Vietnamese moved south in American helicopters idday, abandoning their bases at Sepone and destroying artillery fore they left, spokesmen sald.

Field commanders said the troops moved about 25 miles southto a Sepane to the junction of Highways 914 and 934. They ileasted the South Vietnamese would remain there for several 75, hunting for North Vietnamese arms caches, then move again. The 'air mobility" concept is designed to avoid large battles th North Victoamese troops in Lacs, the commanders said. In light and scattered action in

9 Turkish Political Parties Told To Propose a Regime in 3 Days

By Alfred Friendly

ANKARA, March 14 (WP) .-Turkey's President Ceydet Sunay called on the leaders of its nine political parties tonight to return in three days with their proposals for a new government to replace the one toppled Friday by an ultimatum from the armed forces.

[Leftist terrorists resumed their bombing campaign in Islanbul late tonight, shattering windows

at the American consulate-general, an American bank and the offices of a rightist newspaper, the Associated Press reported.] The politicians met with President Sunsy for 45 minutes, iu contrast to a six-hour meeting the head of state held the day before with the military commanders. The disparity itself is indicative of where ultimate

power resides in the nation. Mr. Sunsy, it is understood, did to FLQ Terrorist to Appeal

Rose Receives Life Sentence In Killing of Quebec Minister

MONTREAL, March 14 (UPI). -Paul Rose, an admitted Quebec Liberation Front terrorist, was found guilty today of the murder of Labor Minister Pierre Laporte and sentenced to life imprison-

"Vive le Québec Libre." Rose said quietly as he was led from the court.

Rose, 27, showed no emotion as tha verdict was read, although his fiery outbursts had caused him to be expelled repeatedly from the courtroom during his 45-day trial. Rose was still wearing the tattered brown sweater, with boles in the elbows, and green pants that he wore when he and two others charged with the killingincluding his brother Jacques, 23 -were rooted out of a cellar dug-

out by police in a farmhouse south of Montreal in December. Lawyer Robert Lemieux, also a separatist and himself fecing a charge of being a member of the outlawed FLQ, said that the verdict and sentence would be ap-

Paul Rose

sent him with a final plan for a new regime agreed upon among themselves but only for the individual suggestions of each party. It is taken for granted here that the military is insisting on a coalition government as an aiternative to the one run since October, 1969, by the Justice party alone, headed by Premier

Suleyman DemireL The military leaders today gave civilian politicians a year in which to restore social, political and economic order or face a military takeover, UPI reported.]

The military commanders do not themselves have a specific person in mind for Mr. Demirel's successor, but they are believed to favor some nonpartisan personage either from the avpointive members of parliament or from outside.

They asked Mr. Sunay for a government that would move forward effectively with land reform, educational reform and new electoral laws to replace those which at present give party bosses at the regional level the principal voice in naming candidates to stand in the primaries.

With the exception of the Justice party, which holds a hairline majority in the parliament. all other party organizations are reported agreed to a coalition government. They apparently realize that the only alternative is for the armed forces to take over the government and install a military regime.

Mr. Demirel, 47, spoke today to a wildly cheering meeting of his party members in the Senate and Assembly, but his remarks on the idea of a coalition were ambiguous.

However, Mr. Demirel told bis party members in parliament not to lose their resolution, patience and trust. Standing firm as a rock, he said, will be of service to the nation, the regime, and the party-remarks that could be read as advocating resistance to the ultimatum and reassertion of his own leadership role. He did

had been expected to broadcast today was postponed until tomorrow. No reason was given.

2 No-Confidence Motions

Israeli Crisis Follows Mrs. Meir Interview

By Jonathan C. Randal

JERUSALEM, March 14 (WP). -The Israeli government today was confronted with two no-confidence motions in the wake of Premier Golda Meir's risky decision to define for the first time Israel's detailed territorial demands for a Middle East peace

The objective of the motions was to put pressure on the National Religious party to withdraw its key support from Mrs. Meir's coalition cabinet, make its majority dependent on four Arab deputies and thus provoke new national elections,

In the interview with the Times of London, beld Friday and published yesterday, Mrs. spelled out Israel's terrirequirements for security.

She said that Israel must retain the Golan Heights, Jerusa-lem and Sharm el-Sheikh, which controls the Strait of Tiran. Israel also required, she sald, eccess to Sharm el-Sheikh as well as demilitarization of the Smai, which, she said, could be guaranteed by a mixed force that must include Israeli troops.

She sald the border at Elatb must be negotiated; Jordan should not be allowed to cross the Jordan River with troops and Israel should have a presence there, and Gaza must not be returned to Egypt. Jerusalem, she declared, would remain united and part of Israel. Mrs. Meir told the Times that

everything was negotiable but that Israel would not accept dic-tation. Israel considers Egypt's call for a commitment to with-drawal from the Sinal and Gaza as a demand for capitulation as the price for peace. If the 73-year-old premier was

worried by the motions, tabled by the hawkish Gahal and Democratic Center opposition parties, she gave no indication at the

Indeed she calmly handed out the text of her Friday interview with the Times of London as If to underline her will to make the ministers understand that the time had come for the long-postponed national debate on the Arab territories occupied in the 1967 war.

As cabinet spokesman Michael Arnon recounted the meeting. "she took the initiative" because "it was an open secret that somewould raise the question [of the interview] anyway."

"Well-balanced" debate lasted less than a half hour, he said, with some unidentified ministers praising the interview and others -aimost certainly the three National Religious party members-

on the 37,600 municipal councils. The majority was also coing well in Paris, where, following next Sunday's runoff, it could well gain control of the Municipal Ccuncil. Though there seemed to be a

slight swing away from centrism and toward both the majority and the opposition left, few local favorites were trailing. Election agreements made between tomorrow and next Sunday will so far toward determining the final vic-

Observers tonight noted a certain tendency toward bipolarization and away from the mass of center parties, following today's first round. The Gaullists, wherever they coocluded local alliances with the center and right, tended to improve their score over 1965 The Communists and Socialists also improved their position when

they worked together. No Landslide There was nothing close to a

landslide, however, as during the last general elections in 1968, when the Gaullists won a clear majority of the National Assembly. Though there were some notable

exceptions to the swing away from the center, particularly in Rouen and Marseilles, the losers in this first round seemed to be the center-left coalitions. In Lille, for example, the outgoing Socialist mayor, Augustin Laurent, aligned with the centrists, barely stayed ahead of his Gaullist challenger. although in 1965 he ran up an easy 10 percentage-point lead. In Arras, the Socialist-Communist ticket led by former Premier Guy Mollet easily won a first-round victory.

Egypt Says Israel Confirms Its Policy Is Expansionist

By Marilyn Berger

(WP) Egypt, through its envoy here, lashed out yesterday at Israeli Premier Golda Meir's stated demands for territory as the price of a Mideest settlement, calling them proof that Jerusalem's pol-

Assad Sworn As Syrians' 14th President

BEIRUT, March 14 (NYT).-Lt. Gen. Hafez Assad, 44, was installed yesterday as Syria's new president after he received overwhelming support from voters in

Gen. Assad took the oath of office today at a special session of the newly appointed People's Council His term will be for seven

An official announcement said that 99.2 percent of the voters said "yes" to Gen. Assad's nomination. Only 15,000 of two million men and women voters said "no," it was reported. The turnout was said to be 95 percent of the country's registered voters, the highest in any Syrian election since the Arab country gained independence from France 28 years ago. Gen. Assad is the 14th president, and the youngest, since independence.

Born to a poor Moslem family, Gen. Assad enrolled in the army after completing his secondary education. In 1955, he graduated from the Air Force Academy with a brilliant record. He was sent to the Soviet Union in 1953 for training in night warfare.

A rebel against social conditions in his country since childhood, Gen. Assad joined the Ba'atb Socialist party as early as 1946 and later became one of the key figures in the party's military arm that brought the Ba'athists to power in Syria in 1963. A year later the new regime promoted him to commander of the air force. In 1966 he was given the additional post of minister. His Takeover

Lest November he ousted the radical Ba'athist leadership and appointed a new ons. As the new premier, Gen. Assad launched an "open door" policy that eased Syria's isolation in the Arab world. He followed a liberal economic line but retained Syria's generally Ba'athist Socialist system. He then pursued the Ba'athlist bid for Arab unity. He joined Egypt, Libya and the Sudan in their projected federa-

Abdel Halim Khaddam, the Syrian foreign minister, declared Friday that Syria would never agree to a peace-keeping force of the Big Four powers to be stationed in Arab territory as part of a Mideast settlement.

Israel Crops Damaged by Big Storms

JERUSALEM, March 14 (Reuters). Severe damage to citrus crops just coming into bloom was reported today after unseasonable blizzards, hailstorms and gales swept across Israel.

Farmers said gale-force winds, gusting up to 50 knots, had seriously affected this year's crop of oranges and lemons, but it was too early to make any assessment of the full damage. Vegetable growers also reported losses in the storms, which hit the country last night and today.

Strong winds stranded three empty oil tankers near the shore between Ashdod and Ashkelon, in southern Israel. The ships were chartered by Israel's Zim line. In the north, snow isolated a number of Galilean settlements and made the slopes of Mount Hermon, in the Israeli-occupied Golan Heights, inaccessible.

Jerusalem was shrouded in white and army half-tracks were used to clear snow from the road leading to Hadassa Hospital

Weather forecasters said ths wind and snow-coming after spring fashions had already made their appearance in Tel Avivwould continue tomorrow.

Mrs. Meir Interview Spurs Government Test force winds and heavy rain halted traffic at Betrut International Airport for periods today and vesterday. Telephone communications between Beirut, Amman and Da-

mascus were knocked out. Syrian and Jordanian airports were open only for limited traffic. Rain and snow swept across Cyprus yesterday, blocking roads

and breaking a spell of warm Into Sepone weather which had attracted Into tourists to beaches. Thirteen Turks were reported frozen to death today in a freak

blizzard around Konya, 145 miles south of Ankara. The blizzard, which began early yesterday, was still raging at nightfall today with winds over 60 miles per hour. A storm dumped three inches

of snow on Istanbul yesterday, cancelling most international air flights and slowing road traffic

Spacelab Prelude Seen in Russia's Next Long Flight

MOSCOW, March 14 (NYT) .-The Soviet Union's chief designer of spaceships was quoted today as having said that his country was preparing another manned orbital flight of long duration as a prclude to the creation of a permanent space laboratory.

He declared in an interview with Sotsialisticheskaya Industriya, an economic daily newspaper in Moscow, that the Sovuz spacecraft, the standard Soviet manned vehicle, had "undergone necessary modifications to ensure fulfillment of a long and cx-tensive program."

Publication of the interview prompted speculation that the new prolonged manned mission might coincide with the Soviet Communist party's 24th congress, opening March 30. The congress, held every four or fivs years, is an important gathering at which the nation's leaders outline goals and eet priorities in domestic and fcreign policy.

The record for long flight was established last June by Soyuz-9, in which Col. Andrian G. Nikolayev and Vitaly I. Sevastynanov orbited the earth for 18 days. The two later reported that they had suffered serious debilitation and discrientation from prolonged weightlessness.

Mrs. Gandhi Gets Margin Of Two-Thirds

4-Party Opposition Has Only 49 Seats

NEW DELHI, March 14 (Reu-ters) -- Prims Minister Indira Gandhi's ruling Congress party today achieved the two-thirds majority in India'e House of the Peopls that it needs to introduce major constitutional changes. The Congress party has so far won 348 seats in the 521-member

lower house of parliament against only 49 for the main four-party opposition. The remainder of the seats are divided among par-tles sympathetic to Mrs. Gandhi, regional groups and in-

But for constitutional amendments to be pushed through successfully a similar two-thirds majority is needed in the upper houss, which was not affected by this month's general elections. It was in the upper house that Mrs. Gandhi's bill to strip the former Indian princes of their privileges was defeated by one vote last year.

Election results are now almost complete. Two constituencies will not vote until May and in a third, voting has been post-poned because of the death of

Returns today from West Bengal showed the Marxist Com-munist party and the Congress virtually neck-and-neck, raising the spectre of further instability and bloodshed in the state.

In West Bengal, which was put under direct central government rule a year ago after the Marxist-dominated coalition government collapsed amid confusion and violence, the Marxists have won 108 seats to 104 for the Congress party in the State Assem-bly. But the Marxists' allies in a united front bold another 12 seats in the 280-seat house. Only ten results are not yet final.

Of the 35 West Bengali seats in the central parliament so far declared, the Congress party has won 12, one less than its previous strength. The state sends 40 representatives to New Delhi, The Marxists' leader, Jyoti

Besu, won a major battle defeating former state chief minister Ajoy Kumar Mukherjee of the Congress party. Mr. Basu was Mr. Mukherjee's deputy in the

Norway Crisis Ends, Bratteli Forming Minority Regime

OSLO, March 14 (UPI) -Norway's 11-day government crisis ended last night as Labor leader Trygve Brattell announced he had formed a new minority government to replace the center-right coalition which resigned earlier this month. The cabinet

will be sworn in Tuesday.
Mr. Brattell, 61, a former Nazi
concentration camp inmate, was sked Wednesday by King Olav V to form a new government to replace Per Borten's four-party coalition, which resigned March 2 after Mr. Borten admitted he had leaked confidential information concerning Norway's negotiations with the Common Market. Mr. Bratteli's government com-mands 74 of the 150 seats in the Storting (parliament) against 76

U.S. Will Test MIRVs in South Pacific Islands

WASHINGTON, March 14 (AP). The United States is planning to install facilities for testing and monitoring multi-warheads for intercontinental ballistic missiles in some small, uninhabited islands in the South Pacific, officials said today. The facilities will be on Canton and some adjoining is-lands, about 2,000 miles southsouthwest of Hawaii.

The officials said that the planned installations are important for further development of MIRV warbeads for the Minuteman-3 ICBM. The United States is in the

process of updating its Minute-man force, backbone of its land-

based nuclear counterattack capa-

bility. Of 1,000 such missiles in place, 56 are now three-warhead Minuteman-3s, The goal is 550. The main islands in the new test area, Canton and Enderberry, have a total of only 27 square miles, including lagoons, officials said. Because the islands have been owned in common with Britain since before World War. II, London's consent was obtained and Britain is to receive a reported \$250,000 for ten years of U.S. use of the area.
All tests are to be conducted

without nucelar warheads.

ket and environment issues, probably will be established.

on the question.

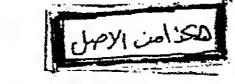

Mr. Bratteli would follow a cautious course because his party is in the minority in the Storting. That would mean that the government will probably avoid such controversial issues as diplomatic recognition of North Vietnam during the 1969 election campaign, and nationalization of private banks, a move which would be popular with the left wing of the party, the sources

Servan-Schreiber Tells U.S. Congress

European SST Seen as 'Industrial Vietnam'

By E. W. Kenworthy WASHINGTON, March 14 (NYT) .- Jean-Jacques Servan-Schreiber, member of the French National Assembly and former publisher of the influential weekly, L'Express, said yesterday that the Concorde, the British-French supersonic transport, 'looks to us, on this side of the Atlantic, like an industrial Vietnam."

In a cable to Sen. William Proxmire, D. Wis., who is a foe of federal financing for the American SST, Mr. Servan-Schreiber said of the Concorde:

the beginning has proved to be wrong. The cost of the SST has multiplied here, as it will everywhere, four times the initial

"By all normal decision-making systems, it should have been canceled long ago, but the debate and the cost have for years been kept from the public. The facts have not been available until the most recent months when they could no longer be hidden. Now the public eye is on the project and what it sees is bankruptcy. NEW YORK, March 14 (NYT). -Pan American World Airways filed: a \$24 million suit Friday against the government, Lloyd's of London and 14 leading American and British insurance companies to press its claim for damages sustained after Arab guerrillas blew up one of its Boeing-747 jet strliners in Catro last fall.

The imprecedented _uit followed lengthy, unproductive talks between Pan American and the insurers to determine whether the claim would be paid under its war-risk or all-risk insurance. The decision will have its greatest impact on the London insurance market and Lloyd's, which would save an estimated \$10 million if the court rules that the all-risk coverage applies in this instance.

Both paintings were so well that barglers were making off

known that experts doubted if the thieves could find a market Both were priceless, one is a

portrait of a Florentine nobleman by Flemish artist Hans Memling and the other was a madonna and child by Massacchio.

The painting by Memling had been given to Hitler by Mussolini during World War II and was brought back to Italy only seven years ago.

The man who traced the Memling work was Rodolfo Siviero, an art detective who now is head of the Italian govern-

ment'e Department for Art Recovery. When he learned of the latest

theft, Mr. Siviero said: "After spending so much effort and the state's money to get back so many works of art that have been taken out of Italy, they can't even be put on public display without being stolen by the first thief that comes along."

Triptych Stolen Meanwhile, thieves broke into the chapel of the convent of San Bernardino at Sinalunga near Siena last night and stole a riptych by Sano di Pietro. Burglars stole a painting of

Abraham in the desert by Antonello da Messina on Friday night from the Church of the Santissima Amunziata at Forza d'Agro near Taormina in Sicily. In Rome, police were hunting for robbers who held up a sacristan at pistol point and made off with a beweled statue of the Child Jesus from the church of San Andrea della Valle.

month already looks small compared to the financial quagmire

Mr. Servan-Schreiber sent the cable because he was unable to come to Washington, as planned, to testify before the Senate Appropriations Committee that is considering whether to approve an appropriation of \$134 million to finance work on two SST prototypes through the end of this

Mr. Servan-Schreiber said yesterday that the chief executive of the Concorde program released "facts" last month about delays, technological difficulties and mounting costs that led this executive to conclude that "all of this will cost an eventual loss of 50 SST commercial options [to huy] per year and that one more delay, after the deadline of 1974. would simply see the European SST cancel itself out of any possible market."

Among the revelations of the last twn months, Mr. Servan-Schreiber said, were the follow-

. The maximum pessenger capacity, as a result of flight tests, had been reduced from 134 to 110 or less. "At that level," he said, "the plane can be bought hy Air France and BOAC only if it flies at full capacity on every flight, an impossible assumption, as any airline executive knows."

• The range of the Concorde has also been drastically decreased," so that while it can still fly non-stop from Paris and London to New York, it cannot do so from Berlin, Hamburg, Frankfurt

• Maintenance costs have jumped from an estimated 30 percent over those of present jet Dianes to 60 percent, and as a result "the initial and basic idea that the fare for an SST passenger would not be more than the first-class seat today on normal jet aircraft is abandoned." and the SST passenger will have to pay 30 percent more than the first-class fare now.

• The builders have refused airline requirements for design changes to lower the noise level, saying that the changes are "impossible within the present bud-

· Since the Concorde's first test flights in 1969, it has flown "less than 10 percent of the number of hours of test flight that were planned as a minimum for testing the project." The head of the Concorde program has disclosed that "what was planned to be achieved in 1973 will not be accomplished before the second half of 1974," even if the money is made available.

Mr. Servan-Schreiber said that expenditure of public money on a plane designed only for incredibly few rich people" could not be defended in a country whose need for housing, schools, hospitals and roads had become "social scandals."

The real question, he said, is "should man be the servant of the industrial system or its master?" "It is not an American, not a

French, not a British debate but a universal and truly crucial test," he said.

A Bird Cry Halts Lumbering-Was It 'Extinct' Woodpecker?

COLUMBIA, S.C., March 14 (NYT) .- South Caroling ofricials have agreed to postpone for one year timber harvesting in a 10,000-acre swamp that may be the habitat of the ivorybilled woodnecker.

Cries from the hawk-sized bird, thought for 40 years to be extinct, were reportedly heard by an Audubon Society official last month in the dark recesses of the Santee Swamp. The 25-square-mile area is roughly 40 miles northwest of the Four Holes Swamp area, a 3,800-acre tract purchased early this year by the Audubon Society for \$1.5 million.

There has yet been no sighting of the ivory-billed wood pecker but Robert Manns, sontheastern representative of the Audubon Society, calls the bird's presence "a virtual certainty." His discovery came on a trip to the swamp last month. Mr. Manns said the taped mating call he played had drawn a response from the swamp.

"No other bird will return the call in the same way except an ivory-billed woodpecker. There was either someone in the swamp who is awfully good at imitating the bird or there's a bird there," Mr. Manns said.

Crime Control Evaluated by N.Y.C. Survey

Inefficient, Unjust; New 'Blueprint' Given

By David Burnham

NEW YORK, March 14 (NYT).

The first over-all study of how well New York's police, prosecutors, courts and jalls light crime has coocluded that they are "neither efficient enough to create a credible fear of punishment nor fair enough to command sincere respect for its

This blunt assessment was offered yesterday in a 120-page report by the Criminal Justics Coordinating Council, an agency established by Mayor John V. Lindsay to decide how federal crime-fighting dollars are spent in New York.

So far, the city has received \$8.5 million in such federal aid. Another \$17.5 million is expected by the end of this year.

Mr. Lindsay, in a brief statement, hailed the plan as "a blueprint for an effective war against crime in New York City."

The city's "crime control system poses little threat to the average criminal." the council reported, citing statistics showing that only 18 percent of all reported robberies, 7 percent of all reported burglaries and 6 perceot of reported grand larcenies result in an arrest Felony or Misdemeanor

Of all those arrested on felony or misdemeanor charges, the report went on, only 32 percent were found guilty of any charge. And for the comparative hand-ful that are convicted, the counconcluded, 7.4 percent received a seotence of more than one year, 50 percent less than a year and the balance suspended sentences.

In discussing the question of fairness, the council report said. "The bail system, which treats pre-trial release as a privilege be bought or earned, and which incarcerates persons in large crowded institutions for long periods before adjudication of guilt or innocence, is perhaps the most nefarious element in the entire criminal justice system. Its practices add up to institutionalized injustice."

The council said it had identified the five "most critical" problems confronting the city's system of criminal justice and that a major part of available federal funds and the time of its 17man professional staff would be directed at trying to solve them. Five Problems

The five problems were the breakdown in deterrence caused by the inability of the courts to process arrested suspects with fairness and dispatch, the spread of narcotics addiction, the con-ditions in the city jails, the lack of city rehabilitation programs and the absence of widespread programs to prevent crime by young persons. The council said one of the

most serious problems of the crime-fighting agencies in New York-and other cities-was the lack of cooperation among the police, the prosecutors, the courts. probation and parole agencies and

Car Safety Official Condemns Nose Cone' Bumper Design

WASHINGTON, March 14 (WP) - The government's first auto safety chief bas accused car makers of "needless spearing and lacerating" of pedestrians and bl-cyclists by designing vehicle front ends like "devices of warfare."

At a Senate Commerce Committee hearing last week, the former official, Dr. William Haddon jr., showed slides likening the protruding "lips," "nose cones" and "snouts" on 1971 American cars to the pointed and sharpedged contours of ancient and medieval weapons, including poleaxes and battering rams.

The industry, he argued, has "deliberately Ignored" a health principle known to man for thoupoint or sharp edge.

Dr. Haddon, after leaving what is now the National Highway Traffic Safety Administration, bepresident of the Insurance Institute for Highway Safety. The institute, which began sponsoring crash testing with 1969 models, is supported by three associations of insurance firms.

The witness disclosed new crashtest data showing that the cost of repairing autos damaged in

Calley Trial Judge Gives Three Rulings

Lieutenant's Defense Is Badly Weakened

FORT BENNING, Ga., March 14 (Reuters).—A military judge today gave three rulings which badly weakened the defense of 1st Lt. William L. Calley, facing 2 possible death sentence on charges of murdering more than 100 South Vietnamese civilians.

The judge, Col. Reid W. Kennedy, said in one ruling that issuing an order to kill unresisting persons was illegal.

The defense contended that Lt. Calley, accused of killing 102 South Vletnamese civilians, merely followed orders. Under U.S. military law, if an order is illegal a soldier has a duty to disobey it. Col. Kennedy also said that the jury could consider defense psychiatric testimony only to reduce the offenses and not for an out-

Psychiatrists Report

right acquittal.

Two defense psychiatrists have testified that Lt. Calley suffered from diminished mental capacity caused by combat stress, preventing him from discerning the legality or illegality of superior

The third ruling concerned whether Lt. Calley could be convicted if found guilty of only part of a charge.

The 27-year-old lieutenant is accused of murdering 102 South Vietnamese civilians on March 16. 1968, in the village of My Lai. The deaths are broken down into four charges—that he killed 70 civilians, that he killed 30 clvilians, that he killed a monk and an infant.

Rejects Defense Col. Kennedy rejected the de-

fense contention that Lt. Calley had to be found guilty of killing all 70 and all 20 people to be convicted of either of the first two charges.

The colonel said the jury could connection with the infant-premeditated murder, unpremeditated murder, voluntary manslaughter, assault with intent to murder. assault with a deadly weapon, and

Four Other Verdicts

He cited four possible verdicts for the other three chargespremeditated murder, unpremeditated murder, voluntary man-slaughter and innocent.

Premeditated murder carries a maximum sentence of death and a minimum sentence of life im-The jury could sentence Lt. Cal-

ley to a maximum life imprisomment on conviction of any of the other charges. Col. Kennedy issued his rulings

at a special session he called to try to speed the conclusion of the 4-month-old trial The rulings were delivered to

attorneys for both sides and will be explained to the six-officer panel that comprises the jury after the final arguments, which

opponents outside his house.

The interview, in the Sunday
Times, was with the young
French Marxist Regis Debray. released in December after four years' imprisonment in Bolivia.

In an introduction to the interview, the newspaper pointed out that Mr. Allende's was the first Marxist revolutionary government in the world to win power constitutionally in a democracy. He was elected on Sept. 4 last year and assumed office on

He said that the outgoing minister of finance gave a speech calculated to intensify the false impression of chaos in the country, and then there followed the bombing of public

Mr. Allende was also quoted in the interview as saying that two attempts were made on his life, and the army commander-inchief was killed because he refused to take part in the reactionary conspiracy.

Policeman on Guard

Mr. Debray asked if it was true there had been an attack on members of Mr. Allende's family in front of his house, and that he had to defend them with a gun because the government had "forgotten" to allocate a guard. The president replied that at the time of one of the attacks on his home only one policeman was on guard, and he had no orders to shoot.

There was a big gang of attackers, the president went on, and he had to come out shooting to frighten them away.

ous and simple, yet his people were portrayed with the subtle compassion of one who knew their secrets. Mr. Kent rarely bothered to bow to conformity. "I have only one life and I'm going to live it as nearly as possible as I want to live it," he remarked a few

years ago, adding: "Life has always been, and God help me, always will be so exciting that I'll want to talk about it. I rate even my being an artist and a writer by being heart and soul a revolutionist. I think that the ideals of youth are fine clear and unencumbered; and that the real art of living consists in keeping alive the conscience and the sense of values we had when we were

Beginning in the late 1920s. the artist joined a score or more of committees and organizations that espoused causes also advocated by Communists. He was active in such groups for the rest of his life. Among them was the 162,000-member International Workers Order, a fraternal society of which he was president and which was dissolved in 1950 by court order as "Communist-

Supporter of Russia

Mr. Kent was also a consistent supporter of the Soviet Union, to which he gave 80 of his landscape paintings and 800 of his drawings and from which he received a Lenin Peace Prize

In 1953, the artist refused, on Fifth Amendment grounds, to say whether or not he was a ommunist when he was questioned on this point by the late Sen. Joseph R. McCarthy. Outside the hearing, however, Mr. Kent again insisted he was not a party member. He made no effort, though, to disguise his social and political beliefs, say-

When I was a young fellow, I was very much disturbed by there being some people with lots of money and lots of people with no money. I thought a lot about it and I read a lot about it, so that when I voted for the first time, I voted Socialist. I'm still disturbed by the fact that there are some people with a lot of money and a lot of people with no money and a few million

is rich in resources and that people are starving to death, and that all the people in the world want to live and yet a good part of the time they're busy killing each other."

In flaunting these views, often

crustily and cantankerously, Mr. Kent found himself ignored as an artist, and his reputation in the United States declined in the 1950s and 1960s. It rose, however, in the Socialist bloc countries, where his revolutionism was accounted a virtue. Mr. Kent was born on June 21, 1882, in Tarrytown Heights, N.Y., the son of Rockwell and Sara Holgate Kent. His father was a mining engineer and a lawyer. His formal schooling was somewhat hit-or-miss. What the youth enjoyed was painting and

Heroin Smuggler Is Dead in N.Y.

drawing, which he worked at

NEW YORK, March 14 (AP),-A major heroin smuggler, Luis Stepenberg, 44, died Thursday while in federal custody, of an apparent heart attack, federal officials said Friday.

Stepenberg, who was held at the federal detention headquarters, in lieu of \$1.5 million ball for sentencing in a federal court, reportedly became ill. At his recent conviction in Brooklyn on 15 counts of narcotics violations—each of which could be punishable by up to 20 years in prison—U.S. At-torney Edward R. Neaher called Stepenberg a top importer of heroin into the United States and a leader of a major international smuggling ring.

Ayub Khan Recovers

RAWALPINDT, March 14 (Reuters).-Former Pakistani President Ayub Khan, who suffered a mild heart attack on March 7, has been discharged from a hospital bere, it was announced today. It was the 64-year-year-old field marshal's second case of heart trouble since he suffered a severe

with no jobs, and that the world essiduously in vacation times while studying at the Columbia School of Architecture.

For a dozen years after leaving college, he practiced architecture, hot in 1904 he went to live on Monhegan Island, Maine, where he built a house and supported himself by manual labor while painting. In the next ten years, he wandered, working as an architect and union carpenter in New Hampshire, Connecticut and Minnesote. He went to New-foundland in 1914 and was expelled on suspicion of being a German spy.

Wanting to go to Alaska to paint the mountains and the sea and the wilderness, he had himself incorporated in 1916 as Rockwell Kent, Inc., and sold chares to his friends; with the proceeds, he managed to live for year on Fox Island in Resurrection Bay.

Age did not mellow Mr. Kent's caustic attitudes. In giving some of his paintings to the Soviet Union in 1960, he explained that he had leen spurned by his native country for his political beliefs. And in accepting the Lenin Prize in 1867, he announced that he was giving his award to the people of North Vietnam. The State Department complained that such an action constituted trading with the enemy. But since the award was made in Moscow and in Soviet currency, the complaint came to

Ford Gets U.S. Aid On Wheel-less Train

DETROIT, March 14 (WP),-Ford Motor Co. has received a federal contract to study the possibility of using magnetic energy to replace wheels in high-speed trains of the future. Foster L. Welden, Ford's trans-

portation research and planning director, said that the company has been experimenting with the concept for some time.

It will now be working under one-year \$130,000 contract from the Federal Railroad Administra-tion. The contract is to study the attending a dinner Priday night. feasibility of the concept. No one was injured.

DURLEN, March 14 (UPI). John Carmel Cardinal Heman, Britain's Boman Catholic primate, said today that Britain is a "post-Christian nation, a land of former believers" where religion is no longer considered relevant.

In a sermon-here, Cardinal Heenen said that in Britain "few people are members of any church."

The people have not rejected Christianity it is only that religion is no longer regarded as important or, as they would say nowadays,

Couple in Calif. Contend They $oldsymbol{Thrive}$ on $oldsymbol{DDT}$

NORTH HOLLYWOOD, Calif., invito 324 March 14 (AP) -Robert Loib! 14.00.05 reports that he feels better, his Galla appetite has picked up, his wife Louise's dandruff disappeared and her teeth and gums are healthier. The reason, he says,

Tar velca is DDT. old wife, owners of a pest con-tro firm, started taking 10-miligram capsules of the pesticide on Feb 17, they said, to show that it is not harmful to humans.

"We're going to continue al-ways with this," Mr. Loibl said. He said that their intake is 300 times what the average person es in a normal daily diet.

Federal and California officials have ordered DDT gradually withdrawn from agricultural and home use saying that its accu-mulation in the body could damage bedy organs Dr. William Westlake, a University of California chemist, termed the Loibl experiment ridiculous. He said previous studies showed that "the intake of even larger quantities of DDT causes no apparent

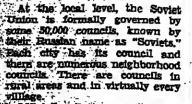

Nixon Will Speak At Young Burial

KRY BISCAYNE Fig. March 14 (WP) President Nixon will fly to Lexington, Ky. Wednesday to speak at the burial service of Whitney M. Young, executive director of the National Urban League it was amounced here.

yesterday.
White House Press Secretary
Ron Ziegler said that after consultations with Mr. Young's famfly it was agreed that "the most appropriate way for the President, on behalf of the nation, to pay tribute to Whitney Young" would be for him to speak briefly

at the burial service.

The President will not attend the funeral service in New York Tuesday, but he has postponed a cabinet meeting scheduled for Tuesday morning until later in the day so that some cabinet members may attend. The President dispatched an Air Force plane to Nigeria to return Mr. Young's body to New York. The Urban League leader died there Thursday while swimming.

Officially, these councils have wide powers, ranging from allocation of housing to supervising how factories meet their economic plans. They are also responsible for such public services as transport and street cleaning, supervise markets, cultural establishments and many of the services that are privately managed in the capitalist world.

50.000 Councils

The council members are elected every four years, but in practice, local Communist party or-ganizations usually choose the candidates, who run unopposed in their districts.

Yesterday's decree criticized local party and higher govern-mental bodies for often taking actions without consulting the local councils. But most of the criticism was directed at the councils themselves for not being responsive to the needs of the people, or in supervising the work of local industrial and agricultural enterprises.

"Serious Neglect" "Serious neglect is found in the work of rural and urban councils," the decree said. "There are many cases when questions brought for examination are

indged superficially, without a serious criticism of shortcomings." The decree said that steps must be taken to insure the independence of local councils "in deciding basic questions of serving the population, of organizing services, retail trade, public eating places and cultural and educa-

tional work. The work of local councils is a frequent source of complaint by Soviet people who have to appeal to them for help in solving many everyday problems such as inadequate bousing, admission of children to day-care centers, and the condition of their neighbor-

Protestants Press Campaign Pope to Name To Oust Ulster Government

BELFAST. March 14 (UPI) .-Protestant militants stepped up their campaign today to oust Prime Minister James Chichester-Clark from office. Terrorists blew up a sewage pumping station near the Irish Republic during

the night. About 600 troops sealed off the town of Benburg and surrounding areas in County Tyrone near the border after the blast ripped through the village pumping station late last night. There were no casualties.

Protestant militants said that Mr. Chichester-Clark would be ousted from office within a week and replaced by a right-wing member of the ruling Unionist party who would deal more severely with Roman Catholic extremists.

The country is now against him," said John McKeague, chairman of the Shankhill Defense Committee, a militant Protestant organization in Belfast, "He must go and we believe be will be gone pefore the week is out."

Observers to Rome Synod

ROME, March 14 (NYT).-The Vetican announced yesterday that Pope Paul VI would select priests from all over the world as nonvoting observers at the Episcopal Synod here next Oc-

The decision was regarded as a step toward major participation by the lower ranks of the clergy in Roman Catholic Church government. The Synod will deal with the problems of sacerdotal

Participating in the Synod, scheduled to open in the Vatican on Sept. 30 and to last about four weeks, will be representa-tive of all national bishops' conferences, the superiors of religious orders and all cardinals.

Pope Paul has put two items on the synodal agenda—the priestly ministry and justice in the world.

Working Paper

A working paper that recently was circulated among bishops indicated that the question of whether married men may be ordained to the priesthood will be discussed at the Synod. The issue of priestly celibacy as such is not listed as a matter for debate but some bishops may attempt to discuss the matter.

Pope Paul, in various recent pronouncements, has emphati-cally restated the rule of priestly acy. However, churchmen various countries have suggested that mature married men should be admitted to the priesthood, especially in areas lacking sufficient clergy.

The forthcoming Synod is a

consultative assembly. The announcement yesterday

said that the Pope had asked bishops all over the world to consuit their priests on that part of the Synod's agenda that deals with the problems of the priest-

Rome Magistrate To Cite Heads of Orphanage Unit

ROME. March 14 (Reuters) .-Charges are to be brought against the entire Executive Council of ONMI, the state organization responsible for the administration of orphanages here, smid a mounting scandal touched off by

the death of a two-year-old child. Magistrate Luciano Infelisi has been investigating orphanages and children's homes following an inquest into the child's death at which it was disclosed that dozens of bite marks were found on her body.

During his investigation, Mr Infelisi bas had nearly 300 institutions raided by police and carabinleri and has brought charge against more than 100 of them. He has arrested two priests and a lay brother-one priest for excessive punishment and the other for sexual offenses against young

Pope Appeals for Balance In World to Achieve Peace

VATICAN CITY, March 14 to arrive here this weekend. Karol (AP).-Pope Paul VI today implored world leaders to achieve a new and honorable international balance" in the face of what he called "the sad situation" in the Middle East and South-

east Asia. The Pontiff did not specifically mention the extension of the Vietnam war into Laos or the disagreement between Israel and the Arab nations over territories involved in a peaceful settlement in the Middle East. But he said: "The right of various nations

to independence and the legitimate integrity and inviolability of their territories must be recognized. All sides must respect the agreements already approved to the territories which are now theaters of war.

"It will be necessary," he added, "to give the utmost consideration to the vital needs of refugees and populations that are victims of abnormal conditions caused by the current conflicts." "It will be necessary to re-

nounce conflicts of pure prestige and begemony or economic interest in order to find, instead, generous terms of agreement and reciprocal respect." The Pope issued his appeal

during his usual Sunday noon blessing in St. Peter's Square.

League, which has taken over effective control of East Pakistan after a landslide election victory last December.

Mr. Bhutto strongly advocated a united Pakistan. He and Sheikh Mujib have so far falled to agree on constitutional issues. The Awami leader has demanded virtual autonomy for East Pakistan. Today Mr. Bhutto, a former

foreign minister, said that if power was to be transferred to the representatives of the people before any constitutional settle-ment, as demanded by Sheikh Mujib, it should be given to the Awami League, majority party in East Pakistan, and to his own People's party, the majority in West Pakistan.

Minority groups in West Pa-kistan yesterday appealed to President Yahya Khan to ask Sheikh Mujib to form an interim government until a new constitution has been framed and promulgated. The appeal followed an urgent meeting of six small parliamentary groups trying to end Pakistan's political crisis and its danger of a split between east and west.

Eagle Aids Gnat: U.S. Air Power 'Supplements' Saigon's in Laos

By Alvin Shuster SAIGON GNYT), Every afternoon at 4:15 when reporters gather for the war briefing, long known as the "follies," an American officer reports U.S. air power "supplemented the capabilities" of the South Vietnamese Air Force in operations in Laos the day before.

In pobtical terms, "supplemented" has a nice and convenient ring to it. It sounds as if the South Vletnamese are flying all over Laos, supporting their own troops in battle, bringing in their own supplies, knocking off enemy tanks and dropping tons of bombs, and then U.S. planes just fly in for a while to apply a few finishing touches.

How can any war critic get upset over a little "supplemental" air power? After all, there are no American ground troops involved. The Washington theory seems to be that so long as you keep American feet off the ground, you'll get into no trouble But a visit to the sprawling

American air bases near the Laotian border and a check of the sortie levels flown by American and South Vietnamese pilots are enough to show that "sup-plemental" hardly reflects the realities. "It's as if an investor says you put up \$10 and I'll sup-plement it with \$15,000," said one

Since the South Vietnamess

crossed the border to strike at is making up the difference be-Communist supply lines on Feb. 8. American fixed-wing warplanes have flown more than 3,-000 sorties, giant eight-engine B-52 bombers have been dropping about 900 tons of bombs a day on the Ho Chi Minh Trail network and American helicopters have flown nearly 30,000 sorties ta sortie is one plane on one

Asked about the sorties by the South Vietnamese over Laos, an American military spokesman said that "they are really too small to count." He noted, how-ever, that South Vietnamese pilots are busy over Cambodis and South Vietnam.

In short, American air power

tween success and fallure in Laos. And there is no doubt that tha whole operation could not have occurred if it were not for the U.S. warplanes overhead. The American planes fly the

South Vietnamese troops into Laos, bring tons of cargo to the battlefield area, transport supplies and food to the fire bases, haul the heavy artillery in helicopter alings across tha moun-tainous terrains, bring out the South Vietnamese wounded and, sometimes, take the hlame from pressed South Vietnamese troops for not being on time.

Moreover, American C-130 planes are now dropping 15,000-pound bombs that create instant

landing zones which would take troops on the ground weeks to clear oot of the jungle, One dropped around Sepone hefore the South Vietnamese moved into the area last weekend killed around 100 North Vietnamess

"We not only take the artillery in," said a Marine Corps pilot Quang Tri combat base last week, 'we also take it out. When the South Vietnamese gave up one of their bases, we were ordered to go in and get the heavy artillery back. We got a few back, but then one of our choppers was shot down, so they said to lorget the rest."

So far, 61 American helicopters

have been shot down in support of the South Vietnamese operations, 50 over Laos and 11 in the Khe Sanh area of South Vietnam. The downings have killed 36 Americans and wounded 61. Many other U.S. helicopters—the command does not say how many—have been shot down over Laos, but brought back across the border.

Most important, American warplanes are responsible for probably more than half of the 7,000 enemy troops reported to have been killed in the month of the operation. Last Thursday, for example, the South Vietnamese command reported that some troops moved into an area six miles from Sepone, the key

port has become a rallying point

road junction area, and found 465 dead North Vietnamese "These areas were previously raided by B-52 bombers," the communique said. Back across the border in South Vietnam, 8,000 American

soldiers are providing the security for the rear flank of Saigon's Engineers, who earlier rebuilt the road across the northernmost province of Quang Tri, are now at work on the new headquarters for the Sonth Vietnamese commander....

Three American brigadier generals were at the offices of the commander, Lt. Gen. Hoang Kuan Iam, one day last week. Other advisers are visible, hud-dling over charts and maps.

short of course, of ground troops at a state the South Victorian of whether the South Victorian of whether raises the question of whether the South Vietnamese can really the the hack it, as President Nixon put it at his last new conference. The answer is that they probably can, so long as they have American warplanes and helicopters in the sides.

They unidountedly will have the such air support for some time. The such air support for some time. The such air support for some time. The support for some time.

ME STA

There is no doubt, therefore, that the Air Force pilots and Army, chopper crews will be among the last to go as the American presence is decreased.

Feel Rear Is Protected

South Vietnamese See $oldsymbol{No}$ Counterattack Peril

By Iver Peterson

SAIGON (NYT).—When Vice-President Nguyen Cao Ky grumbled last month that the incursion into Laos could end up as his country's Dien Bien Phu, he wasn't saying anything that South Vietnam's joint chiefs of staff had not already thought of.

Before the operation was launched, a Defense Ministry group assigned to study possible enemy responses to the thrust against their supply lines paid special attention to the lessons of the French debacle in 1954, when the North Vietnamese surrounded and slowly pummeled the northwestern advance outpost at Dien Bien Phu into the ground.

The command recalled that the North Vietnamese commander. Gen. Vo Nguyen Gian, had launched a series of smaller attacks in three widely separated Indochinese areas, in order to draw the French forces away from the fateful valley in northwestern Victnam.

"We are not afraid that the Communists will mount an offensive in our rear," a South Vietnamesc colonal said. "They don't have the men, and they don't have the supplies. I am not usually optimistie, but I think that this time the Communists are on the losing side."

The officer's statement seems to be borne out by events. In its summary of battle activities for last week the South Vietnamese command reported that enemyinitiated incidents, from single sniper shots to full-scale attacks. "decreased extremely" in tha fourth week of the operation in

According to officers in the South Vietnamese Ministry of Defense, the only enemy action launched since the Laos incursion that could be likened to the diversionary feints employed by the North Vietnamese in 1954 occurred two weeks ago across the "triborder area" in Kontum Prowince. In that action, the enemy leunched a small force from Ban Het in southern Laos across the border in a move that might have threatened the town of Dak To if the government had not it with air, artillery and infantry assets that Gen. Giap never had to face during the first Indo-

Nor do the South Vietnam worry about the recent Com-

munist advances on the Bolovens Plateau in southern Laos.

"Well, you know," said one ARVN strategist as though he were trying to be polite, "the Royal Lao Army is not very effective. It does not mean that we should be afraid." The South Vietnamese com-

mand estimates that the Ho Chi Minh Trail has been 95 percent cut, and that the enemy within South Vietnam's borders have about two months of supplies left for normal harassing activities. and not enough to mount a large enough attack to distract the ARVN from their task in Laos.

They explain this estimate by pointing ont the essential difference between enemy and allied operations: In the case of the allies, supplies follow the troops into battle, but the Communists must first "seed" the battlefield with caches of arms and food before launching any offensive more than a few days' march from their base areas. It was this initial movement of suppltes that tipped the command off to a possible thrust into Kontum Province, chief of staff strategists say, and no further arms movements have been spotted so far.

The South Vietnamese admit that there is a corollary to their presumption that the enemy lacks the means to mount a counteroffensive to the Lacs operation: that the invasion of the Ho Chi Minh Trail network could not have been launched before now, whatever enthusiasm there was for such a drive as far back as

four years ago.
The allied strategy, the officers point out, has been to push the main force enemy units out of South Vietnam's populated regions and so deny their support to the indigenous guer-rillas. If they push shead too fast, and neglect their rear areas. the enemy will go around them as with the Tet offensive in 1968. Now, in Laos, they say in the heady optimism that pervades the Defense Ministry, the strategy is being carried to its logical conclusion—the enemy is being pushed clear out of the

country. The small guerrilla actions that are expected to continue in South Vietnam do not disturh the command in its present mood. "Terrorism," said the optimistic "is a matter for the

the Spanish fleet off Santiago de Cuba in 1898. "Now," as an American admiral noted here last visits by Soviet surface ships and submarines into an area that is politically volatile."

Russia and U.S. Play It on the 7 Seas

'I Spy' Is the Name of the Game

By Drew Middleton

SAN JUAN, Puerto Rico (NYT). -The Soviat and United States navies are plunging deeper into a game of "I Spy," played with complex and delicate electronic instruments across the seven seas.

The game involves hundreds of ships and aircraft and thousands of men. Both sides argua it is necessary, but the Americans concede that in a gama without ground rules there is always

The appearance of a Russian surveillance ship in the U.S. Navy's training area south of Cuba and the leisurely voyage of two Soviet oceanographic research vessels in the West Indies recently aroused some alarm in Washington. The Russians, to he sure, were only doing what Americans are doing from the Barents Sea to the South China Sea, hut the Caribbean has been an American preserve since the Navy sank week, "we can look for repeated

Geographic Disadvantage

Geography has placed the Rus-

Vladivostok. Soviet fleets must derwater microphones. This sys-move into the high seas through tem does not include the southrelatively narrow channels.

Sovlet submarines of the Arctic fleet leaving Murmansk on the Barents Sea swing north of Norway's Varangerhalvoya peninsula and its radar. Bot they are picked up hy American submarines when they round northern Norway and head south for the western Atlantic and the Mediter-

Ships of the Baltic fleet can reach the Atlantic only past Den-mark's island of Bornholm and through the Strait of Oresund between Sweden and Denmark, the latter a North Atlantic Treaty Organization member. The Black Sea fleet, from which the Soviet Mediterranean squadron is drawn, can send surface ships into the middle sea only through the Dardanelles, past inquisitive Turks, also NATO members.

Unrelenting Surveillance

Once a Soviet ship is at sen, the surveillance continues.

American P-3 planes, based on Reykjavik, Iceland, pick up Soviet ships moving southward west of that island. The Royal Air Force's coastal command and American aircraft patrol the gap between Scotland and Iceland and the exits of the Baltic.

Russian submarines approaching the eastern coast of the U.S. are detected by a system of un-

and west of Cuba or the U.S. Gulf coast. Surveillance there is left to air and sea patrols.

Subs Could Be 'Lost'

At the moment, therefore, Soviet submarines armed with strategic ballistic missiles could he "lost" after they anter the Gulf of Mexico. Once "lost," they can approach the Guif coast until military installations in the central U.S. are within range,

Constant and improving American surveillance has not dis-couraged the Soviet Navy from widening its operations, including surveillance. Fleet Adm. S. S. Gorshkov, in a speech on Red Navy Day, said Soviet Navy ships are constantly in the ocean, in-cluding the stamping grounds of the NATO strike fleets. The presence of our ships in these regions ties the imperialists' hands and deprives them of the opportunity freely to interfere in the peoples' internal affairs."

Most modern vessels of the two navies, surface or underwater, can participate in surveillance. Both fleets include specially built surveillance ships and, in addition, the Russians use their fleet of about 200 oceanographic re-search vessels for this purpose. On both sides, the nuclear submarine equipped with nuclear missiles is the quarry.

for American environmentalists trying to stop the march of technology, the homber defense issue this year will be a focal point for lawmakers trying to contain Pentagon spending. Sen. Mark O. Hatfield, R.,

Ore., has said as much. This year he heads the Members of Congress for Peace Through Law, a bi-partisan group of 115 law-makers that has taken on the Pentagon with some success in recent years. "In this decade." Sen. Hatfield

said, "when the Soviets are op-grading their missiles and not their aged bombers, a commitment to a new air defense system easily costing \$6 billion seems totally unwarranted."

Yet the Air Force-with the hacking of many senators and representatives-argues that bomber defense cannot be allowed to die as long as Russia keeps its relatively small force of 150 long-range bombers intact and continues to show any interest at all in building new ones, even medium-range types.

Money, politics, jobs, intelligence findings, war plans and guesses—all this and more are wrapped into the argument as the lawmakers try to decide if the \$5 hillion or more the Air Force wants to spend on modernizing air defense over the next six years is a justifiable invest-

A good starting point for understanding what is involved in this complex but significant debate is at Fort Pischer, a Backup Intercapt Control Command post in the flatlands along the Atlantic beaches outside Wilmington. N.C.

This Air Force BUIC base is one of a string of sites that ring the perimeter of the United States. Fort Fischer represents part of the \$25 billion the United States has invested in building and operating bomber defenses since the 1950s. It is also one of those that has survived the huge cutbacks of recent years.

Reflection on Cuts

The big white balloon-the radar built to warn of approaching Russian bombers stands out against the backdrop of pines in the distance. Inside a low brick building are the computers, telephones and teletypes that would send up American fighters to

Sen. Mark O. Hattield

intercept Russian bombers before they could reach the main-

Reflecting on the homber defense cutbacks, the BUIC base commander, Col. Robert L. Embrey, said, "We can only go so far. We need something to build on. If we go shead and shist everything up and the Russians do come in with a new bomber we're in a hell of a position." The same view prevails about 347 miles away from Fort Fischer

in the offices of Air Force generals in the Pentagon. More Fort Fischers are not the auswer, however. Nor are the Army's 1950-style Mike-Hercules anti-aircraft missiles 80 batteries

of which rimmed the country at me time. The Army, which has been closing these batteries down during the last three years as too costly and ineffective, has an nounced another big reduction which will leave only about 40 sites still operational.

What is needed for the 1970s, the Air Force says, is a new kind of air defense—one which essen-tially takes Fort Fischer's radar of the ground and puts it inside sirplanes. Such airborne radar planes called airborne warning delens, will hinge on more and control systems or AWACE—sophisticated—and harder to and control systems, or AWACS—could look down from above to

The Air Force is recommending putting 42 AWACS airplanes on guard—a \$3.7-billion venture. Other parts of the new homber

Pakistan on the Brink

By Selig S. Harrison . ANGKOK (WP).-Is Pakistan heading for an inevitable ial breach between its eastern d western wings? Or is the rrent sound and thunder from e eastern capital of Dacca next a protracted, Asian-style barining process likely to result in entual accommodation?

The possibility of secession by mgali-speaking East Pakistan growing increasingly serious llowing two weeks of intermitnt violence in Dages, marked by least 300 deeths. Rising hib-mess on both sides has poshed resident Yahya Khan and the ngali leader, Sheikh Mujibur ahman, into a potentially un-ntrollable nycle of challenge M response.

Paced with angry Bengali mobs of warnings of imminent separaon, Gen. Yahya best a stragic retreat last weekend by versing his earlier stand insinitely postponing the scheded March 3 opening of a metitation-drafting National Asnew wave of Bengali wrath r fletly : spurning demands

ir an immediate end to martial

When President Yahya set a. w March 25 opening date for assembly. Sheikh Mujib, incipal leader of the 70 million engalis in the eastern wing, id a wildly cheering crowd that is 167 Awami League supporters ould not take part in meetings the 313-member assembly: while the harsh language of eapons still booms in our ears nd guns are pointed at us."

Foreign Aid Eyed

308 The shelkh's bid for an end martial law as a condition for ttending the assembly and his aguely worded call for the At transfer of power to the elected epresentatives of the people wave left the future uncertain. The yields to the sheikh, Gen. now holds mider a martialgranting too much autonomy to American officials are prepar-

ing for the worst and have begun to map contingency plans lookng to possible multinational aid Spetween Gen. Yahva and the in heikh in the days and weeks head fall to produce a settlecres fenent. Preliminary estimates iriinclude that a newly independent Tast Pakistan could face emer-

and con

The possibility of secession by Bengalispeaking East Pakistan

is growing increasingly serious following two weeks of violence in

Dacca marked by at least 300 deaths.

gency financial needs totaling as much as \$100 million.

A sovereign East Pakistan would .. be the world's seventh most populous nation, outranked by China, India, the United States, the Soviet Union, Indonesia and Japan.

Gen. Yahya reaffirmed his right to veto a constitution that goes too far in the direction of sutonomy in his speech last week. He warned grimly against

While he already refers to East Pakistan as the "Bengal nation," Sheikh Mujib threatens secession only as a last resort and is urging West Pakistan to accept a compromise formula giving the Bengalis full autonomy in all fields except defense and foreign affairs.

He has even hinted that he would accept a setup permitting two separate prime ministers in East and West Pakistan despite the fact that the majoriy won by his Awami League in the December assembly elections "clearly entitles us" to leadership over the whole country. This would give control of West Pakistan to former Foreign Minister Zulfikar Ali Bhutto and his People's party with 83 assembly seats.

Awami Leagus leaders face strong separatist sentiment in their ranks and could turn abruptly at any time onto the secessionist path if hope for a compromise faded.

Revolution-Prone

A volatile mixture of economic spair and political frustration, East Pakistan sits perennially on the edge of revolutionary vic-

lence. East Pakistan is separated by more than 1,000 miles of Indian territory from West Pakistan. More importantly, the Bengalic of the east are worlds apart linguistically and culturally from the Punjabis, Pathans and Sin-dhis of the west. They are darker and cat rice in contrast to the wheat and lentils of the westerners. Only the bond of Islam reinforced by a shared fear of Indian domination holds the two wings togethter.

The Bengalis bitterly charge that West Pakistan police, sol-diers and officials lord it over them with the mentality of "occupation forces," treating them contemptuously like country cousins. They complain that the west takes the lion's share of development projects and foreign aid even though East Pakistan has a population majority and earns the country's biggest single slice of foreign exchange with its jute

The heart of the current stalemate is the Awami League de-mand for full financial autonomy, including control over foreign exchange earnings, customs duties and internal taxation.

In effect, the shelkh is calling for a loose confederation rather than the federation or quasiunitary arrangement that Gen. Yahya and Mr. Bhutto have in mind, and he has demonstrated in recent weeks that it might not be possible for the west to impose anything more binding hereafter

General Strike

The general strike declared by Mujib last week in Sheikh protest against the postponement of the assembly revealed that the Awami League already exercises some of the powers of a parallel government. "Peace patrols" wearing green and white Awami armbands have provided the most effective law-and-order machinery in Dacca

Despite the numerical majority enjoyed by the Bengalis in the national population of 125 million and their dominant position in the assembly, Mr. Bhutto argues, the "special character" of Pakistan as a divided state makes it necessary for the east to forgo full control of the government in the interests of unity.

Mr. Bhutto calls for a "viable central government" and says there is no point in the assembly going to constitution-drafting: it will merely be rubber-stamping what Sheikh Mujib dictates. It was Mr. Bhutto's boycott of the assembly and his demand for negotiations beforehand that provided the rationals for Gen. Yahya's postponement of the as-

He Saw a 'Great Cop-Out'

A Last Word From Whitney Young

By Whitney M. Young Jr. Mr. Young, executive director of the National Urban League, wrote this article for The New York Times shortly before his death March 11.

THE statements of concern and the rhetoric of "involvement in the community" that emanated from so many public relations departments of major corporations a few years ago seem to have given way, if not to a retreat, then to an orderly withdrawal, from the problems of society.

In many quarters, the "great involvement" in the social arena is beginning to look like the "great cop-out." In fact, our business leaders sometimes act like restless college kids, flirting first with civil-rights action, then speaking up against the war, and, now, clutching the new-found environment issue to their collective bosoms. That sound, hard-headed

same qualities they find so reprehensible in others lack of staying power and dilettantism -is a rough charge, but a very deserving one for some inhabitants of executive suites.

businessmen are reflecting the

2 Phenomena

The period of corporate activism in special concerns coincided with two phenomena of great importance—a booming economy and the spread of urban rioting. On the one hand, companies were rolling in rec-ord high profits; on the other, they perceived civil disorders

as harming the good climate for business and as demanding responsible civic action from

the corporate citizen. Corporations that had never put their toes in the muddy waters of urban problems plunged in, not nearly as deep as they should have, but at least enough to get their feet wet. Now, crying that the water is too hot, many are clambering back to shore. The result of this unseemly dash to the beach is that the motives of many corporations are called into stion. And their pullback has endangered worthwhile programs, increasing the frustrations of the ghetto.

A good case in point is what happened in the New York Urban League's Street Academy program. This program, which has taken high school dropouts

tive educational techniques, has placed many in the best colleges in the country, is having its troubles. Some of these are related to administrative and other causes, but the root cause of the problems is fiscal—not enough dollars. Some of the academies have had to close their doors because corporate sponsors dropped out, refusing to fund them for more than the initial year or two.

Recession

One company blamed its pullout on the recession. "When the red ink shows," said an executve, "anything that is not of a direct business nature is the first to go." Another corporate official showed the complacency that drives so many critics of business up the walls: "We've done our share," he said. "We've put \$100,000 into the picture."

The same businessman will pour many millions into research and development of new products. He'll only expect a 5 per-cent return, even though he'e dealing with known chemical and physical properties.

But when he's trying to help solve social problems 400 years in the making, created by the racialist attitudes of companies and unions like his, own, he suddenly expects fast returns and instant successes.

It is beginning to look like business, in its attempts to become part of the solution, is once again becoming part of

Young Yugoslavs Leave the Land

By Alfred Friendly Jr.

NOVI SAD, Yugoslavia (NYT).—Young people are disappearing from Yugoslavia's granary, the Serbian autonomous province of Vojvodina, moving into this attractive provincial capital on the banks of the Danube, and leaving behind a social and economic problem that officials believe is critical

"At least 75,000 farm households in the province are made up of either aged or disabled people who have no children to till the land when they die," noted Jura Kohot, Vojvodina's under secretary of agriculture, in an inter-

. "It's a very serious social prob-lem because there is no old-age pension program for private farmers and an economic prohlem because it means a loss to

"We have seen it increase rapidly over the last ten years, and the trend away from the farm is still rising."

Fewer Farmers

In Serbia as a whole, the number of farmers has dropped by 1.7 million in 20 years of steady rural exodus, and official demographers estimate that 700,000 more will disappear into the cities in the next 12 years. In the nest little village of Kovilj, ten miles east of Novi Sad Radovan Vukov, director of the village cooperative, shrugs off

the problem as insoluble.
"It's the fashion for the young to leave the village," he says. "We have a new school, new water system, television, movies, a pharmacy. We're even about to pave the side roads in the village. "But I don't see any of this affecting the situation. The

problem hasn't hit us hard yet, but it will in a few years." A 57-year-old farmer, Zarko Subic, both of whose daughters have married and moved to Novi Sad, agrees that village life is easier now than it was in his youth, but he sees no way to make it attractive enough for modern

voungsters. "What would they do here?" he asks with a tug at his shapeless corduroy jacket and a smile

on his creased face. Once a youngster from here finishes secondary school in the city, he doesn't want to come back and farm with us."

Major Producer

With spring planting still three weeks away, farmers have plenty of time to air their complaints. The province's rich black soil is as fertile as ever. Experiments with hybrids and fertilizer have raised production to the point that Vojvodina supplies 40 per-cent of Yugoslavia's wheat, 65

percent of its corn, 85 percent of its sunflower seeds and 60 percent of its pigs.

Mechanization also has helped make farming both profitable and bearable. The Kovilj cooperative, for instance, has 130 tractors now compared to about 30 a decade ago. The number of privately owned tractors in the village has gone from three to 50 in the same

But agricultural prices have not advanced at the same pace as those of industrial goods. The produce market, farmers complain, is so unstable that corn prices have doubled in six months without permitting most growers to take advantage of the increase.

Work Necessary

Advances in technology make possible to farm the land successfully with only 25 percent of the province's two million inhabitants engaged in agriculture, instead of 50 percent as now, says Milos Miskov, editor of a weekly agricultural paper. "But along with the new techniques and equipment," he says, "there is an army of people who cannot be thrown out of work."

Many older private farmers have shown a willingness to turn their land over to cooperatives in return for guaranteed pensions as low as \$20 or \$26 a month. But even that sum can prove too high.

"The only way out we can see," Mr. Miskov concludes, "is state intervention. But the state is not rich enough to change the situation now. It is a very hard problem, and it will take a long time to solve."

The Costa Smeralda. Where money can buy the things that money can't buy.

Progress report from Sardinia

est in the Costa Smeralda-as omparable holiday aree and as a haven for people looking for 2 cound house-continues to grow.

In seven years, more than \$84

million has been invested privately ad by the Italian National and r Regional Governments to establish the Costa Smeralda as the finest resort development in the Property sales in 1970 were up

over 30% above the excellent

* Apartments in condominium doelopments are being sold as fast as they are built; many more partments are scheduled for conruction this year.

The Costs Sineralda's distinctive otels are being enlarged to meet the extra demand for holiday accommunication which is growing at three times the world average.

Assured appreciation

Already, hand values on the Costa eraids are showing a healthy capital appreciation. Carefully-applied building controls ensure the lowest density figure for any tourist coastal area in the Mediterranean these controls themselves assure controlled capital growth.

Investment in the Costs Smeralds is further safeguarded by Italy's membership of the Common Market -all of whose members are pledged to maintain a number of fundamental laws affecting inter alia the security of foreign investment. And there are few developments like the Costs Smeralda that he within the European Economic Community.

Attractive opportunities for property development Scienced areas of land on the Costa Smeralda have been zoned

for commercial or for mediumdensity residential use: hotels, restaurants, clubs, groups of villas or apartment condominia. If you are interested in promoting this kind of development, the Consorzio Costa Smeralda can provide you with special reports which generally include assessments by independent market research analysis and land development consultants.

Investment incentives

Low-interest loans and capital grants can be obtained for hotel and restaurant projects from the Cassa per il Mezzogiorno (the State development corporation) and also from Sardinian financial institutions. Several tax exemptions can also be obtained.

Everything you need Already nine areas along the Costa Smeralda's 35-mile coast have been developed. These areas are equipped with water mains, electricity and tele-

One of the areas, Porto Cervo, is the main centre and principal port of the Costa Smeralda. A sheltered deep-water harbour for yachts drawing up to 21 ft., it is the best-equipped in the Mediterranean - offering plug-

in electricity and fresh water at quayside, and on-board telephone. The village centre has everything you need: a supermarket, chemist's shop, fashion boutiones, antique and jewellery shops, hairdresser, restaurants, burs, night clubs, post office, ship chandler. There is also a church,

a doctor and a kindergarien. Action can be found elsewhere, too, on the Costa Smeralda. There is a wide choice of hotels, restaurants and night club/discotheques. You can rent a car or boat, horseback ride and enjoy every kind of water sport.

Golf and tennis Two new sports facilities open this year. In Porto Cervo, the Cervo Tennis Club has floodlit termis courts, a heated indoor pool, an outdoor swimming pool and full sports club

for play by midsummer. (Building Landscape preservation

phone and are served by 24 miles of The natural vegetation and the coastline are carefully protected. From the beginning, special steps to prevent all forms of polkution have been taken; landscape scarring is being eliminated: buildings bousing unsightly basic utilities are camouflaged; cables are laid underground where possible; and only indigenous building materials are sended. The most modern ent is used in the sewage system and rigid controls prevent discharge into the sea.

> How to buy Prices for ready-built villas and apartments vary with size, location and the amount of land. Apartments start as low as \$11,000. A 2-bedroom villa with large sitting room, dining annexe, tiled kitchen and bathroom, terrace and garden can be built from \$29,000, land included.

A quarter-acre plot of land with all services currently costs from \$9,600 upwards. This includes roads, electricity and water supply to the boundfacilities. In the centre of the Costa ary of the site and, where necessary, di Voipe and Pevezo, is the 18-hole actually move into your private villa the coupen to the address given.

Pevero golf course designed by between als and nine months after Robert Trent Jones. It will be ready negotiating site and plans. The Agenzia Immobiliare della

Costa Smeralda (the appointed real (estate agents) can also recommend architects and builders and provide complete on-site supervision. All plans must be approved by the Architectural Committee of the Consorzio Costa Smeralda. Once you have bought on the Costa

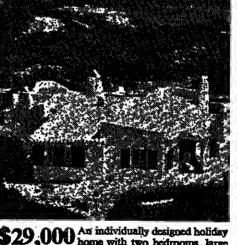

Smeralda you automatically become a voting member of the consortium of property owners.

Fly Alisarda The Costa Smeralda is served by Alisarda, the Sardinian airline. It flies regularly to Olbia (30 minutes from Porto Cervo by road) from Rome, Milan, Genoa and Nica.

Olbia's 4,600 ft. all-weather strip can also handle any private plane, including the largest executive jet. Car ferries sail regularly to Olbia or Porto Torres from Civitavecchia (Rome), Genoa and Toulon,

Free information

A wide choice of sites is currently for sale. There is also a limited number of villas and apartments ready for immediate occupation. Send for prices and for specific details of villas and apartments or information about property devel-Smeralda, between the bays of Cala a main drainage system. You could opment opportunities by sending

\$29,000 An individually designed honday home with two bedrooms, large ng room, one bathroom, kitchen and terraces. 1,410 sq. ft. of construction on a freehold plot of land of a quarter to one-third of an acre.

Technological Urgency in Vienna

It has often heen remarked that man's preatest danger lies in the conservatism of his institutions, as opposed to the radicalism of his technology. This, of course, has very little to do with the purely relative ideological differences among human institutions -in fact, those differences, and the intense emotions they stimulate among those committed to one form or another, pose the greatest danger that technology will get out of hand. This is one of the obstacles that will confront the negotiators who gather in Vienna to resume the strategic arms limitation talks. Another is the sheer momentum of technological change in weapons of mass destruction.

There was another conference that assembled in Vienna, a little more than a century and a half ago. That congress had to deal with the results of twenty-five years of revolution and war in Europe, years that had shattered dynasties and governments, overturned the establishments, political, economic and intellectual, of centuries, and left an explosive residue of new ideas scattered over the whole of the Continent. But there had been hardly a single important technological innovation during the whole period that the congress reviewed. There were the beginnings of canned food, to be sure, and across the Atlantic the steamboat was coming into use. But the steamboat had not been adapted to military uses (in fact, in the critical campaign for the control of Lake Champlain, the United States Navy had specifically ruled out the one steamboat available there and had concentrated on oars and sails)

Napoleon went down to defeat at Waterloo with armament that represented only minor refinements on that developed by the Bourbon monarchy he replaced, and his enemies

had done little more, although the British improved the trail of their field pieces, and showed greater respect for the capabilities of the muzzle-loading rifle, donbtless because of their experience in America. In fact, in essentials, Napoleon fought with the weapons of Mariborough, a century before, and the Congress of Vienna had no reason to suspect that its attempt to settle the affairs of Europe would be challenged by anything more deadly.

Nor, in fact, was the technological face of war changed for another half-century after the treaties of Vienna, when railroads and armored ships breech-loading rifles and artillery, ushered in war of a new scale of intensity. Contrast that slow change with what the SALT talks confront today: Within a period comparable to the revolutionary and Napoleonic wars, there have appeared supersonic jet planes and atomic-powered submarines; intercontinental missiles, armed with hydrogen warheads-and the pace of devastating change is accelerating, not slowing down, Calculations of time of mobilization, of huffer zones, and "strategic" frontiers-even ocean vastnesses-have been rendered academic (Israel should take note) for all except a kind of police action.

Yet within this stark, new framework of peril, the old institutions, the old emotions of xenophobia and nationalism, the old territorial imperatives, persist. And with them, no less than with the ability of technology to set up new military equations overnight, the men of SALT must wrestle. They must envy Metternich and Talleyrand, who had to deal, however ineptly, with ideas that were armed with flintlock muskets, not those which may speak with the multiple-warhead hydrogen bombs that could end all ideas in world spicide.

After India's Elections

Mrs. Gandhi, prime minister of India, called elections a year early in order to gain a parliamentary majority, and she has won one of unexpected and immense proportions. Her triumph is more than personal. By routing her factional and regional challengers, she has shown a way to reversing the widely feared political fragmentation of her heterogeneous nation. By assembling such an overwhelming majority, she has acquired both the personal and the parliamentary authority to legislate programs of her choice. By running and winning essentially on a one-plank platform-war on poverty-she has an unmistakable mandate to quicken social and economic change.

Indians and the rest of us will now be able to learn what difference an electoral

success of this sort can make to the governance of the world's largest democracy. Along with Pakistan, India faces, Mr. Nixon has aptly noted, "perhaps the world's most cruel imbalance between human needs and available resources"-an imbalance beyond the righting of the most extensive and effective application of modern technology alone. India's resources do not automatically increase by the measure of its prime minister's triumph at the polls; nor does Mrs. Gandhi's wisdom, or the wisdom otherwise available to her. At the same time, India has acquired by this election a government with a breadth of base and a unity of purpose unmatched since independence. It is a moment when its friends can rightly feel that India is poised to move ahead.

THE WASHINGTON POST.

Self-Delusion About Greece

The report of two investigators for the Senate Foreign Relations Committee on conditions in Greece under the army regime makes gloomy but familiar reading. It will surprise only those who have taken seriousby the fatuous statements of Defense and State Department officials about the early restoration of a constitutional order and parliamentary democracy in Greece.

What is a source of continuing amazement, however, is the attitude of the American Embassy in Athens, which, in the words of the report, "not only rationalizes the lack of progress but often appears to be more concerned with the regime's 'image' than with the substance of its actions"-often more concerned with that image than the colonels themselves.

It was not the enemies of the regime but tis head man, Colonel Papadopoulos, who made nonsense of the optimistic American predictions about Greece by warning at the end of last year that there would be no change in 1971 "as far as the question of

the regime and the constitution are concerned." This meant continuation of martial law with arbitrary arrests, ignoring the constitution's due-process guarantees. Yet, the embassy halls the release of political prisoners when this occurs, while, says the report, ignoring a new wave of arrests.

The fact is that the United States gave the junta what it most wanted-political respectability, above all—when it resumed large-scale military aid last September. The junta gave nothing in return except promises to the American ambassador, who now finds himself unable to persuade the colonels to make good on those promises.

The strategic argument that the U.S. needs air and naval bases in Greece for Mediterranean defense has validity. But it is hypocritical and self-defeating to buttress that military case with filmsy claims that Greece is moving to restore democratic rule. As the report to the Senate committee makes clear. that is what the embassy in Athens, if not the State Department, is continuing to do. THE NEW YORK TIMES.

International Opinion

Mrs. Gandhi's Victory

The brilliant electoral victory of Indira Gandhi is an event without precedent in the recent past of multi-party democracles.

The election results show that she achieved something that is almost incredible. The majority Mrs. Gandhi won is so convincing that it permits her party the sovereign rule as was the case when Jawabarlal Nehru was at the helm.

It is also a personal trimmph for Mrs. Gandhi. With this victory she inflicted a final defeat on conservative veterans of the Congress party.

-From Politika (Belgrade).

In the International Edition

Seventy-Five Years Ago

March 15, 1896 PARIS-Discussion has long waged on the question whether cancer is or is not contagious. so that the question has been left undecided Opinion was, however, generally in favor of the theory of cootagion. Cases are known of the transmission of cancer by a wife to her husband and conversely by the husband to the wife; but here are two which clearly show contagion and have all the value of experiits blackened site and be told: "Here formerly stood the city of Sepone. Two armies supported by big powers fiercely fought here

outcome of the battle."

The Fate of a City

Fifty Years Ago

March 15, 1921 GERMANY-It has lately been said that German disarmament will never be complete as long as the primacy in chemical manufactures is in her hands. Her chemical factories can at short notice he converted from agencies of peaceful production into agencies of war; from dyes and aclds to poison-gas and high explosives. They are now capable of producing enough poisongas to kill half the world. In the chemical industry of Germany there has been a prodi-

The Coming U.S.-Israeli Crisis

By James Reston

WASHINGTON. -- The United States government is trying to avoid an open break with Israel over peace terms in the Middle East, but a break is surely coming unless the Israeli government modifies its territorial demands and its diplomatic

The Nixon administration is not telling the Israeli government what it should do, but it is making unmistakably clear in private, if not yet in public, that Israel will have to choose be-tween its territorial demands and the support of the United States.

Now that Egypt has agreed to "eoter into a peace agreement with Israel" under conditions which Washington regards as a reasonable basis for negotiations, the United States is prepared to put its troops into a UN peace-keeping force as a guarantee of roughly the same frontiers that existed before the 1967 war, but demands for substantial changes in those frontiers.

This will be made plain to Abba Eban, the Israeli foreign minister, when he arrives here in a few days, and it will also be made clear to him that, if the Israeli government is isolated diplomatically by insisting on its present demands, it will have assume responsibility for its own isolation.

Meir Interview

In an interview with the Times of London, Mrs. Golda Meir is reported to have said that Israel must have Sharm el-Sheikh, which dominates the Strait of Tiran, and have access to it; Sinal must be demilitarized: Israci would not evacuate the Golan Heights; never again would Arab forces stand within a few miles of the sea; and Jerusalem must remain united and part of Is-

Israel's emphasis on geographical security was stated quite clearly the other day in an official statement by the Israeli Embassy here:

"Under no circumstances," the statement said, "will Israel surrender its right to a free negotiation with Egypt... It will resist all pressures, from whatever the source, be they military or political, that aim at resurrecting Israel's past territorial vul-nerability by precluding the negotiation of future secure boundaries.

"Israel permitted this to happen once before by acquiescing in the imposed solution of 1957. It will not squander its territorial security again. Israel is ready, in peace, to withdraw from the cease-fire lines. Bot this time the withdrawal will be to boundaries that are secure, and shall be rendered so by geography... Officials at the highest levels

here make several points about all this. First, Israel cannot get the support of the United States. let alone Egypt and the other Arab states, for such territorial demands. Second, geography is not going to enable Israel "to live in peace within secure and recognized boundaries," for this can be achieved only through a genuine political settlement, acceptable to all parties and guaranteed by an international force including both American and Soviet troops, and third, Israeli propaganda suggesting that anybody is proposing to "resurrect Israel's past territorial vulnevability" is unfair, inaccurate. and to use Secretary Rogers's cautious word, "unhelpful,"

The feeling in official quarters here is that the Israeli government at a minimum, should come forward with specific counterproposals to the United Nations intermediary, Dr. Gunnar V. Jarring, rather than putting ont broad and imprecise demands in

This, at least, officials here feel, would keep the controversy in the diplomatic channel and assure the continuation of the present cease-fire. For example, the Israeli government saying it must have sovereignty over the area around Sharm el-Sheikh, or would it be satisfied with an "Israeli presence" there, along with an international peace-keeping force?

statements to the press.

Cairo's Surprise

Rightly or wrongly, the Nizon administration feels that the Israeli government was surprised the concessions made by ring's questions; that it did not expect the Egyptian government to commit itself to terminate all claims or states of belligerence, to respect Israel's sovereignty, territorial integrity and political independence and acknowledge its right to live in peace within secure and recognized boundaries;

UNITED NATIONS, N.Y.-

of the Israeli-Egyptian cease-fire

and despite continuing nerve

warfare and political argumenta-

tion, the United States seems

and to "enter into a peace agree-

guaranteed general settlement of the Middle East problem. It is true that the U.S. proposals would not only put American but Soviet troops into the area and that the peacekeeping force could not be withdrawn without the unanimous agreement of the four major powers (U.S., U.S.S.R., Britain, and France), but the official reply to that is that Soviet troops are already in the Middle East by the thousands, and that Israel's long-range security depends on a political settlement supported primarily by the United States

economic and military arms. The United States is not going "impose" any settlement on Israel. The choice is up to the officials in Jerusalem. They can have the support and guarantees of the United States or they can ingist on substantial territorial gains, but they can't have both.

President Nixon's Peace Offensive

By Joseph Kraft

WASHINGTON—Fresident Nixon is on a peace offensive. In a staccato succession of interview, telephone call and press conference he is proclaiming his deep interest in binding up the world's wounds.

But are these hopeful noises designed to promote agreement in the various on-going negotiations around the world? Or are they aimed more at quieting the public skepticism reflected lo the recent Gallup poll showing that 70 percent of the country doubts what the administration is saying about the war?

The evidence of the statements. themselves is not encouraging. Mr. Nixon repeatedly takes the occasion of setting forth hopes for peace to take a shot at those who disagree with him.

In an interview the other day. he told Cy Sulzberger that "I seriously doubt if we will have another war." At the same time he labeled the "Establishment" which did not back his Vietnam policies "neo-isolationist." and he issued this warning to those who opposed him on the war politically: "Those who are counting on Vietnam as a political issue in this country next year are going to have the rag jerked from un-

Slaps at Press

In a phone call to Helen Thomas of the United Press, Mr. Nixen said he was "cautiously optimistic" about preventing the resumption of hostilities in the Near East. But at the same time. he took a slap at press skepticism about the American peace initiative. He said: "The tendency is to report the exciting things. You don't win a Pulitzer Prize writing about peace."

Then there was the televised press conference of March 4. The President explained in great detall that the "goal" of his policy
"was to get all Americans out of Vietnam." Then he took out after. the TV treatment of the Lacs incursion-"the drumbest of sug-

is overplaying his hand, sticking for terms that he is not able to get other countries to deliver, as in the negotiations to limit Japanese textile exports to the United

In the Paris peace talks on Vietnam, the President has insis ed that there be what he called at his last press conference "withdrawal on a mutual basis." But Hanol-has made it plain all along that it regards mutual withdrawal as surrender. It will accept only a settlement that involves some change in the Salgon regime—and that Mr. Nixon refuses.

Near East

In the Near East, Mr. Minn is trying to bring off an agree-ment whereby this country forces Israel back to pre-war borders and the Arab states, in gratiful make peace with the Israelis and invite the Russians out of the area. Only it takes so much huifing and puring to prist the Israelis back that the highs naturally become suspicious and demand more American pres sure on Israel. At which boint in the Russians back up the Araba thus burrowing deeper than ever.

In the arms control field her Nxon is slowly deploying an Anti-Ballistics Missile as a bargatority chip to bring the Russians to terms. The Russians have agreed to limit their ABM development if this country does—a tremendous step ferward But the Pres. of ident is also trying to get them to limit the number and size of their offensive missiles. And it seems very doubtful they will go agree—at least in the next year

Maybe by sticking to his guns the President can make his terms prevail in all these negotiations. If so, it will be a diplomatic tour de force unmatched since the days of Bismarck.

But slightly less wonderful terms could also promote the cause of peace. The obstacle to these terms is the rigidity of the administration. And in these cir., counstances, it is hard to resist the impression that the present peace offensive is more designed wind down trouble at home than trouble abroad.

Grate With Potatoes?

William A. Erauss's features (March 9) on a visit to Plastas-sier in the South of France was a memorable piece of writing, up to his usual standards in the pursuit of good cooking. In this case he seemed to have been on the acent of a nutmeg or two "urgently needed for noonday mashed potatoes." I'm sure he might expect some jerk to write in and sak, "who ever heard of using nutmer in mashed potstime?"

Well, who ever heard of using ... etc. etc.?..

An ad hoc survey of handy cookbooks failed to substantiate use of the spice in mashed potatoes. A tin box of "ground nut-meg" produced in the United

negotiations on the important Colan Heights ares.

all Arabs is the Old City of Jerusalem which, to addition to

The major emotional issue for

States, found in the lower reaches of a kitchen cabinet recommended use of natmeg in malted milk. egg-nogs, catmeal, toast, broiled and baked bananas, fruit ples, spinach, cream chicken or beef, creamed cheese spreads and lish and see foods among other dishes. But no mashed potatoes.

A French jar of "noir muscade moulus" advises using powdered nutmeg in thick soups, cheese sauces and souffles, fried veal, chicken sauces, hot wines and—a ed at diplomatic Christmas parties. No mashed potatoes. It's possible the cooks of the Netherlands might use it in potatoes but then, having brought the stuff back from their former colony, new Indonesia, they use it in everything. My research, however, was not in vain. An additional use for nutmeg, as a dictionary will show, was as the ball or pea in the game called Thimbierig, through which sharpies swindle, country, folk at county fairs and the like. Why they use a nutine studes me. Surely Mr. Krauss would know. VINCE ROBERTS.

Mariy-le-Rot, France,

Fight for Peace

As an Indian the claim of successive American prosidents that they are "fighting for peace" in Vietnam rings a bit hollow if not decidedly schizophrenic. You work for peace, you fight for war. Perhaps it's just that we Indians are a bit simple . . .

Eurobonds

\$40 Million Sliced From Calendar; Echoes of '70 With a Difference

By Condon Bakstansky

issue door slammed on the Euro-bond market last week with the kind of thud that had not been heard since the grimmer days of 1870.

Some \$40 million worth of debentures that had been scheduled for pricing disappeared as Imperial Chemical Industries withdrew its planned \$30 million offering entirely and two other flotations were trimmed by \$5 million each. It was the sort of thing in call up echoes of last May wbon three issues worth 850 million were withdrawn from the market, a move which ushered in

an exceptionally quict summer. There is one strlking difference in the two situations, however, which is keeping a good degree of guarded optimism alive: The year-ago withdrawals took place against a background of sharply rising money-market rates; the present softness is in spite of a widening gap between short and long-term in-terest rates which is keeping the Eurobond market in an exceptionally strong technical position. That is, in May, 1970, operators were paying up to 9 1/2 percent

for Eurodollars with which to finance positions in a bond market where yields were running 9 percent and up. Under present conditions, Eurodollars are available at around 5 perceent and the bond yield has changed only

PARIS. March 14.—The new-slightly—with any luck, the ssue door slammed on the Euro-spread should be attracting a cond market last week with the bundle of cash, if only for the short term, looking for the sure 3 percent earning power. The fly in the present oint-

ment is the record-shattering amount of debenture-floating that has taken place this year. But that might not have been enough to quash the market without recent gusts of dollar criticism complicated by relatively bigh interest rates available in various national European markets which has lured cash elsewhere.

Sooner or later, however, market observers are betting that the sheer muscle of declining dollar rates will bring bonds back on the Irack. First tentative signs following last Thursday's prime rate cut in the United States tended to support this riew.

On Friday, Bondwade's index for long-term dollar debt bounced ahead 0.04 to 31.52 for a net gain on the week of 0.08. The shortterm index tacked on 0.08 in the day to wind up the week at 98.31, ahead 0.19 since Monday, But it is still a very iffy de-

velopment. The prime rate out came too late to save ICI, due to have been priced Thursday after the coupon had been adjusted upward a quarter-point the week before. And it did not seem to help General American Transport subsidiary GATX too

The GATX flotation was reduced on the pricing data from \$25 million to \$20 million and the coupon raised to 8 1.4 percent from 8 percent. The six-year notes came out et 99 3'4 and promptly plunged two points on the secondary market. One prob-

lem there, dealers noted, was

that with the revision of terms the notes actually yielded less

than if the coupon had been kept

By Albert L. Kraus

NEW YORK, March 14 (NYT).

The corporate bond market managed last week to halt a fourweek retreat. Then, a half-point cut in the prime rate by the Chase Manhattan Bank helped it recover almost half its losses of the previous month.

What happened reflected the steady pressure of the Federal Reserve on the banking system to increase the money supply. The most comfortable thought, and the most probable, was that monetary policy was working in its intended way.

"It makes sense." one observer noted, "with \$4 billion backed up in the new-issue bond market and loan demand lagging for Chase to cut its price to get some of that business."

In the most commonly accepted version of how things work, the month-long rise in bond rates which brought triple-A corporates close once again to an 8 percent yields was an aberration, perhaps not the last. Eventually, the Federal Reserve's eftorts to bring interest rates down would accomplish their aim, a revival of the housing market and consumer durable goods purchases. These, in turn, would add momentum to increases in over-BB output, incomes, profite and

A pleasant scenario. If thinge were that simple, the economists could take a vacation for the rest of the year, returning in the final months to have their sagacity acclaimed. The fact that the situation is still touch - and - go was attested to by other events:

• The reluctance of banks other than the Chase to follow it in its cut in the prime rate to 5 1.4 percent. Most other institutions went down only a quarterpoint to 51/2 percent in this lending rate to their most-favored customers.

• The inability of the stock market to climb through the

990 mark on the Dow-Jones industrial averaga. The market, as it had the week before, got above the level on an intra-day basis but never managed to do so at the close. Trading remained mod-

spotty performance in the leading economic indicators. Retail sales continued to gain in February, rising one-half of less than the 1.5 percent rise in The Commerce Department said

January.

percent increase in capital out-lays this year. While this was considerably better than the 1.4 percent rise they forecast in December, it was accounted for almost entirely by rising prices and centered in areas other than manufacturing.

businessmen are planning a 4.3

Business inventories in January. for reasons not entirely under-stood, suffered their biggest drop-in almost ten years. Stocks drop-ped \$390 million to a seasonally adjusted \$170.84 billion from December. Sales, however, were up \$2.09 billion to a seasonally

adpusted \$109.17 billion.
The biggest uncertainty, however, continued to surround business and consumer expectations. Since the Penn-Central debacle nf last year, businessmen have sought to rebuild their holdings of cash and other liquid assets That is the chief reason the backlog of new corporate borrowings stands at the highest

point ever. Will they continue to demand more funds? Or, convinced that the Federal Reserve and the banking system will meet their needs, will their appetite for funds begin to subside?

Consumer Pattern Similarly, will consumers con-

tinue to defer spending on homes and automobiles, channeling a greater-than-usual percentage of their incomes into savings? Or, as business conditions improve, will they return to more normal patterns?

Much depends on how businessmen and consumers feel about a revival of inflation. The dilemma the Federal Reserve faces is this: If the business community is, indeed, intent on keeping more cash on hand than it thought necessary a year or two ago, the central banking system will have to make available still more funds to give impetus to a business recovery. If it does so, however, it may (Continued en Page 11, Col. 3)

Rothschild Holding

PARIS, March 14—Cie. du Nord: Institute company for the Rottachini group. has reported that are profits fall 34 percent to 534 million francs (\$9.5 million) in 1970 from 56.3 million francs

The firm with it proposes to reduce its dividend to 2.20 from

2.50 fratics per share. The reduction reflects "uncer-

tainties over dividend payments'

from companies operating in Al-

Unit Profit Drops

N.Y. Stocks Drift Aimlessly; **Bond Market Halts Retreat**

(Continued from Page 9) merely convince businessmen that renewed inflation is inevitable. Already awash in a sea of liquidity, they may demand even more.

While expectations can drive up interest rates, at least temporarily, they can't produce business sales. And only rising sales will produce the profits needed to justify the added borrowings. This is another way of saying that the liquidity business now so carnestly seeks will ma a milistone around its neck unless sales and profits rise. If it should become a milistone, the only possible response would

spending and employment. This isn't what most economists think is likely to happen. It shows the perverse nature of. business expectations, however, and the dangers of fanning them

Such things as the entrance of the banks themselves as borrowers in the long-term market

SEC and NYSE At Loggerheads **OnReformTiming**

WASHINGTON, March 14 (NYT),-The Securities & Exchange Commission has told the New York Stock Exchange that it must terminate price-fixing of commissions on large stock transactions no later than April 5, even though it is not technically possible to amend the exchange's constitution by that date.

The commission last week released correspondence showing that the SEC last Monday ordered an end to price-fixing no later than April 5. The NYSE replied on Tuesday that it could not fulfill the necessary steps to amend the constitution

until April 18 or 19. The SEC's answer said that the necessary procedural steps "could have been initiated earlier." It noted that its intention to order an end to price-fixing on large orders was announced in October. and an 1970, April deadline was set in February.

NYSE president Robert Haack raised the possibility that exchange members could be faced with lawsuits if they stopped charging the fixed rates before altering the constitution. The exchange will not follow the SEC suggestion until it has an opinion from its lawyers on the matter, Mr. Haack said.

Eurobonds

debt on offer. Last week's cutbacks were considered a healthy development, but no one ants to see much more along those lines lest the impression be given that the market's ills are deepening. The hope is that the prime rate cut and the accompanying rally in the U.S. bond market will help clear the

In typical fashion, as the dollar-issue sida dried up, the non-dollar markets bloomed.

Norges Kommunalbank's 15 million unit of account, 15-year issue came out at 98 3/4 last week with a 7 3/4 percent coupon and was holding at around issue price in first trades. The French rallway system promptly announced it would raise a similar amount at similar rates.

August Thyssen-Huette is following up the Dutch State Mines 80 million guilder, four-year is-sue at 7 1/2- percent, priced at par last week, with a 60 million FL, five-year issue on the same

And with South Africa's European Monetary Unit offering apparently barreling along, speculation was growing that another EMU borrower would amounce does nothing to help. If anyone should be able to forecast interest rates, it should be the banks. What they say, by jumping into the bond market now, is that they don't expect rates to go

down subtantially. Interest Rate Outlook

Bond market watchers expect a test of business sentiment soon. As long-term rates work down to 7 percent, a level until now regarded as cheap, a surge of new borrowings could occur. This would confirm the belief of some that long-term corporate rates may hold in a yo-yo pattern between 7 and 8 percent.

Much the same thing is true of consumer expectations. Until he becomes convinced—by per-formance, not promises—that price increases aren't going to take away everything he gains in bigher wages, the consumer isn't likely to return to the market

as an uninhibited buyer. This helps explain the good, but not as good as anticipated, performance of the automobile market. It helps explain the misgivings of home builders about public acceptance of their prod-

uct at present prices. In the Alice-in-Wonderland world of expectational economics, things seldom are what they seem to be. A straight line may not be the shortest distance be-

tween two points.

This observation has particular application to where the economy is and where the administration would like it to be. It is hard to fault the administration for selecting a growth target which, if achieved, might bring a substantial lessening of unemployment. Nor is there any question that a government forecast is quite a bit different from a private one. The government has the wespons ultimately to make its prophecy come true.

In the short run, bowever, the administration's direct assault upon an ambitious goal could bring frustration. A revival of inflationary expectations as a result of what the administration does-or merely says-could have the unhappy effect of aborting the business revival it so earnestly seeks.

From the administration point of view, and the economy's, thus, the less than vigorous recovery probably is much to be desired. Whether it is possible politically, however, remains to be seen,

The blue-chip indexes marked time, with the Dow-Jones average of 30 industrials ending at 898.34, up 0.34 for the week. In the broader-based indexes. Standard and Poor's 500-stock index closed at 99.57, up 0.61 and the New York Stock Exchange index closed at 54.38, up 0.36.

Volume on the New York Stock Exchange totaled 91,575,595 shares compared with 82,358,200 the week before.

Four of the five most active stocks advanced, led by Arlen Realty, which climbed 1 5/8 to 16 1/2 on volume of 891,800 This newcomer to the shares. exchange, a result of the recent merger of Spartan Industries with a real estate organization, has become a trader's favorite in the last two weeks.

Second most active was Telex which gained 5/8 to 19 1/8 with 824,800 shares changing hands This low-priced issue continued to stimulate speculative interest with its current price more than 100 percent greater than its 1970-

Federal National Mortgage Association was in third place, tacking on 1 1/8 to 63 3/8. Prospects of increased mortgage activity fueled the demand for this stock.

Southern California Edison was fourth on the list as it added 1/2 to 31 1/2. Several big blocks were included in the week's total volume of 676,400.

The fifth most active stock was Occidental Petroleum, which slipped 1/4 to 18 1/8. Occidental was hard-pressed during the week because of uncertainty over the negotiations between the Libyan government and the major producing companies in that counThese Securities, having been offered and sold outside the United States, this announcement oppears as a matter of record only.

BRIDGE.

The best contract for North-South is three no-trump played from the South position. But this is not easy to reach, whether the opening bid is one spade, as it was in practice, or one club, which would be the choice of those who bar opening hids in four-card major suits,

As the bidding went, South could have jumped to three no-trump after North had bid both major suits. But he not unreasonably jumped to three spades hoping for a four-spade contract if his partner held a five-card suit. North could not bid notrump lacking a diamond stopper, and five clubs was reached.

The opening lead was the diamond queen. East won with the ace and returned a trump with the idea of limiting diamond ruffs in the dummy. South won in dummy, led to the diamond king and ruffed his remaining dia-mond. After overtaking dummy's last trump and drawing one more round, South reached this posi-

South knew that the defenders had only major-suit cards. West could have saved a diamond, but

By Alan Truscott

South would have known where it was and his play would not have been affected. The simple plan is to finess in hearts, and if this fails the spade finesse can be taken later. The contract succeeds unless East has both the missing kings. .

BOUND TO VIOLENCE

By Yambo Ouologuem. Translated from the French by Ralph Manheim. A Helen and Kurt Wolff Book, Barcourt Brace Jovanovich, 182 pp. \$4.95.

Reviewed by Christopher Lebmann-Haupt

VAMBO OUOLOGUEM (pronounced Oo-o-lo-gwern) is a 31-year-old writer/publisher from Mali, West Africa—the descendant of a family who ruled be-fore the French colonisists came; educated in France; and with the publication of his first novel, "Bound to Violence," a winner of French prizes and huge critical acciaim for having produced—yes, one might have guessed it—the first truly African novel. (How very French, such praise!) But even setting such clamor aside, one does not have to read very far into "Bound to Violence" to realise that one is on to some-thing unusual. "Our eyes drink the brightness of the sun and. overcome, marvel at their tears."
It begins. "Mashallah! Wa bismillah!... To recount the bloody adventure of the niggertrashshame to the worthless paupers!
—there would be no need to go back beyond the present cen-tury; but the true history of the Blacks begins much earlier . . . So back we go to the year 1202 "of our era"—to "the age of fendalism," when "large com-

munities of slaves celebrated the justice of their overlords by forced labor and by looking on inert as multitudes of their brothers, smeared with blood of butchered children and of disemboweled expectant mothers, were immured alive ... " And so the tone of unremitting violence is set, and now we will proceed through this bloody history of fictional Nakem (Mali?), ruled over by fictional Saifs ("pronounced Sah-yeefs"), through the coming of the colonialists, two world wars, and down to the present day of indepen-dence—all in 182 pages.

Which is probably what is most impressive about a first reading of this novel—the epic sweep and turnoil that Mr. Ouologuem has managed to convey in so little space: centuries of violence and Pass treachery, masses of lives wasted in the blinking of an eye, cruelty beyond imagination, men swallowing life "as a boa swallows a stinking antelope." One closes the book with what seems like 700 pages spinning in one's head.

How did Mr. Ouologuem manage it? By binding together a variety of narrative modes, among them tales of griots (troubadours whose function it is to celebrate the great events of history and to uphold the God-given traditions"), Arab chronicles, the oral tradition, the prose of 19th-century European fiction and the argot of modern fiction.
Thus Mr. Ouologuem's fictional

history begins with lusty and violent legend, highly mannered in style. At midpoint it zooms in suddenly on the passionate love story of two slaves, Kassoumi and Tambira. Next, it angles accounts of endless intrigues, betrayals and assassinations that it on between the ruling Saifs and the Europeans (the art of And leave it at that murder with trained asps is editying). It settles at last on the adventures of Raymond-Sparia-

cas Kassoumi, the eldest son of Kassoumi and Tambira, who carns the right to be chicated in Paris, spends, years of lone-liness and suffering while study-ing architecture there the sleeps with a prostitute who turns out to be his sister; he has a lengthy homosexual affair with a white man), and returns finally to Nakem to challenge the aging Self with progressive visions of the future And throughout every phase of the complex nar-rative remains distinct, yet modulates the whole.

What does it all mean? Yamho Ouologuem has a rather less than simplistic view of African history Judging from his chronicles in believes that oppression came in three stages from three sources first from local rulers who have ed the "niggertrash" to detend themselves from one another next, from arabs seeking rowers to Mohammedanism; and only finally, from the white color ists. No doubt much will be made

of this by the advocates of the white-devil theory of history and their opponents. But I doubt it that matters a great deal to Mr. spilled St. Conloguem. Mear the small paid TO THE PARTY OF TH Oueloguem. Near the end of "Bound to Violence," a French missionary about tells Raymond z story (which incidentally makes the book's title explicity. The Chinese have a game: the connecting link, they call its They capture two birds and the them of The Trojani together. Not foor close. The cord is thin, strong, with fally long. When the hirds are released, they take flight, they flink they are free and rejoice in the wideness of the sky. But sud-denly: crack! The cord is stretched taut. They flutter and which in all directions, blood drips from their bruised wings, feathers and fluff fall on the onlookers.

Sometimes the cord season down to I in ICI. Sometimes the cord gets fangled in ICI in a branch or taste in a branch or twines around the birds, and they struggle as though birds, and they struggle as though caught in: a trap, peck at each other's eyes, beaks, and wings, and if Providence doesn't impale Babemara Parties in them ones branch one of them dies before the game is over.
Alone, Or with the other, Both of them. Together, Strangled, 213 12 12 3 165 62 22 75.5

"Mankind is such a hird. We are all victims of the game: separate, but tied together. All of us without exception." Amen.

posite corner of the court and dropped to one knee. "I was going like this," said Glover, moving his hands wildly

in troot of his face, "I couldn't make any noise, and I was pray-ing Gary would see me." He did. On the in-bound pass, Sund-macker shipped the ball about 30 feet to Glover, now moving unguarded toward the basket. Glover grabbed the ball and gently pushed in the layup with four seconds

to play.

"That (the layup) was when I was really scared," Glover said.

"I'd missed 2 few of those before besides (7-100t-2) today and, besides, (7-foot-2 Artis) Gilmore was coming in awful fast at me."

Marquette Wins

SOUTH BEND, Ind., March 14 (NYT). — Unheaten Marquette, held in check by Misini of Ohio in the first half, broke away in the second half for a 62-47 victory yesterday in the opening round of the NCAA Mideast reglonals.

Marquette ran its season record to 27 victories and its twoseason winning streak to 39 games. Miami, Mid-American conference champion, bowed out with a 20-5 won-lost record and had a 13-game victory streak

The Warriors, held to a 23-21 halftime edge, scored 19 points in the first ten minutes of the last half for a 41-31 lead that put the game away.

Jim Chones, 6-foot-11-inch sophomore, scored eight points, Bob Lackey six and Dean Meninger five in the surge.

. Carr Works

HOUSTON, March 14 (AP).-Superstar Austin Carr came up with 52 points to lead Notre Dame to a 102-94 victory over Texas Christian last night and advanced the Irish to the NCAA Midwest regional semifinals. Notre Dame piled up a big

lead in the early going but then had to hold off the Horned Frogs late in the game. With Carr scoring 29 points in the first half, the Irish moved to a 56-42 halftime advantage over the Southwest Conference champions. Notre Dame upped

the margin to 18 points early in In the second same of a doubleleader, Honston wiped out a 19point deficit to beat New Mexico State, 72-69.

Porter Leads Villanova PHILADELPHIA, March 14 (UPI) -- Villanova's Howard Porter and Hank Slemontkowski used brawn and agility to control both backboards last night as the Wildcats thumped St. Joseph's, 93-75, in an opening-round game

of the NCAA tournament. Porter, 6-foot-8 and 215 pounds. scored 26 points and grabbed 18 rebounds. His 6-7, 230-pound sidekick added 23 points and 11 rebounds as the Wildcats (24-6) moved into the Eastern Regionals against Fordham Thursday night at Raleigh, N.C.

Fordham 195, Furman 74 NEW YORK, March 14 (UPI). Charlie Velverton, tossing in shots from every angle, ignited an aggressive first-half curge with 21 of his 30 points last night to lead Fordham to a 105-74 rout of Furman in an opening-round game of the NCAA tournament. The triumph was Fordham's 25th in 27 games.

Yelverton, 6-feet-2, enabled the Rams to blow the game wide open early by connecting on eight of 17 shots from the floor in the firet 20 minutes.

Long Beach St. Gains

LOGAN, Utah, March 14 (UPI). -Long Beach State hlunted Weber State's second-half surge with hot shooting by Ed Ratleif and George Trapp last night to register a 77-66 triumph in an opening-round game of the NCAA's Western regionals.

Raileff, a 6-foot-6 sophomore, scored 31 points while Trapp, a 6-9 senior, added 21, as Long Beach advanced to the final round of the Far West regionals next week at Salt Lake City against the University of Pacific.

Morse Paces Penn MORGANTOWN, W. V2.

March 14 (AP).-Bob Morse, a 6foot-8 forward scored 20 of his 24 points in the first half, mostly on long jumpers, to lead Pennsylvania over Duquesne, 70-65, last night in the first round of the NCAA Eastern regionals.

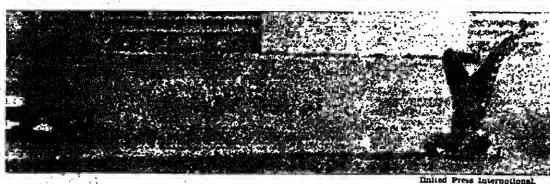

Morse, sveraging only 14.6 points per game, made nine of 19 field shots and two free throws in the half to help the undefeated Quaker break the Dukes' mixed zone and man-to-man defense for their 27th victory.

Brigham Young Wins

2 Triumphs by Liquori Runs Villanova to National Title

By Neil Amdur

DETROIT, March 14 (NYT),-Marty Liquori won his second race in less than 24 hours, and Villanova won its second national collegiate indoor track and field championship yesterday. In a magnificent exhibition of

strength, speed, stamina and tenacity, Liquori added the onemile run to his list of national crowns. Capping his best indoor season, the 21-year-old Villanovs senior outkicked Jim Johnson of Washington and won by eight yards in four minutes 4.7 seconds. If Liquori's time failed to impress a national television audience-such audiences have come to regard anything over four minutes as less than rioteworthy—it was hailed by the crowd of 9,681 in Cobo Arena, which gave the Olympian from ovation in tribute to his physical

and mental ordeal. Liquori ran two distance races 80 minutes spart Friday nighta 4:05.6 qualifying heat in the mile and a victorious 8:37.1 twomile. A trlumph by him in the mile yesterday was a must for Villanovs to pass Texas-El Paso for the team title.

Only one athlete, Jim Ryun, of Kansas in 1968, had ever swept the difficult "distance double" in this two-day meet. Ryun's times in 1968 were 4:06.8 and 6:38.9, well above Liquori's. Point Total is Low

Liquori, who ran with his feet heavily taped to reduce the danger of blisters, trad attempted the grueling two-race assignment before, in 1969. He finished sixth in the two-mile and was eccond to Ryun in the mile.

"I wasn't going for time, I was just trying to win," he eaid with a sigh after yesterday'e vic-"I wanted to go easy on tory. my feet, so I wouldn't have to miss a few days of workouts next week."

Villanova's 22 points was the lowest winning total in the last five meets. The Wildcats' margin of victory came from a thirdplace finish in the one-mile relay behind Adelphi and Tennessee. Texas of El Paso, which took the team lead from Villanova midway through yesterday's program, wound up second. Wisconsin, knocked out of the two-mile relay by a collision on the second leg, finished third.

Meet records were shattered in the 1,000-yard run and high jump. Boh Wheeler, the promising Duke freshman from Timonium, Md., won the 1,000 convincingly in 2:07.4. Pat Matadori of Wisconsin, who cleared seven feet three inches in the high jump last- week, reached 7-2 vesterday. He has not missed a jump under seven feet in four

Villanova's position appeared precarious when Jerry Richey of Pittsburgh passed Tom Donahue of Manhattan and Chris Mason of the Wildcats on the anchor

where you hit them, they keep coming at you when you play Rosewall." Ashe said. Ashe minlifled for the finals yesterday by heating fellow countryman Bob Lutz, 6-4, 6-4, 7-6. Rosewall, who played his first game at White City when he was

"No matter what you do or

seven years old, was never in trouble in today's 92-minute match. He needed only 19 minutes for the opening set. Ashe continuously had a hard time with his first delivery and seemed content to try and slug it out with Rosewall from the base line. He double faulted 13

times, Rosewall once.
Miss Goolagong moved into the final when she swamped Scottish lass Winnie Shaw, 7-6, 6-1 in just over an hour in their semi-final clash yesterday.

After today's victory Mrs. Court said she "might have a go" at repeating her effort of last year when she became only the second woman, following American Maureen "Little Mo" Connolly, to win the grand slam.

John Newcombe and Tony Roche completed a sweep for Australia by winning the men's doubles title from Tom Okker of the Netherlands, and Marty Riessene, Evanston, Ill., 7-6, 6-2,

the two-day meet, Tom Ulan of Rutgers beat Clyde McPherson of Adelphi by inches in the 440. The Turnville Named invitation mile saw three runners Von Ruden, Erian McElroy, the NEW YORK, March 14 (AP). -Edward A. SOFIA, March 14 (UPI) - pean games last year at Vienna. track and field championships ended here today with three new world records being set and a thrilling five-hour battle in the pole vault, the top event of the two-day meet.

by Marcus Walker of Colorado.

Wolfgang Nordwig of East Germany took the pole vault with an indoor world mark of 5.40 (17 feet 6 1/2 inches) after battling nearly five hours against world outdoor record holder Chris Papanicolaou of Greece, world indoor record champion Kjell Isaksson of Sweden and Soviet world champion Juri Isakov.

Isaksson, who held the previous indoor world mark with 6.30 meters, took second place while Isakov came third with the new Soviet record mark of 5,30 meters. Papanicolaou, one of the favorites for the title, suffered a leg injury on his first jump and had to withdraw.

The other two world marks were set hy Soviet woman shot-putter Nadezhda Chizhova with throw of 19.70 meters and by Margaret Beacham of Britain who bettered her own world record to win the 1,500-meter run

in 4:17.2. Soviet athletes took the lion's share of the gold medals with eight victories followed by West Germany and East Germany with four gold medals each.

West German athletes held a slight edge over the East Germans as they took five silver and two bronze medals compared to two silver and one bronze for Nordwig, after setting the new

pole vault world mark, said "It's

been a tough battle the longest five hours in my life." Henryk Szordikovski of Poland, won the 1,500 meters in 3:41.4 and was one of eight athletes to defend their titles, which they won at the first indoor Euro-

Wales Defeats Ireland, Clinches Rugby Union Tie

CARDIFF, Wales, March 14 (UPI).-Wales clinched a tie for the Five-Nations Rugby Union championship yesterday by overwhelming Treland, 23-9, at Cardiff Arms Park. Only France can now stop the

Welshmen. The teams clash in Paris in two weeks and a French victory would mean a tie at six points each. A capacity crowd of 52,000 singing, chanting and cheering fans saw the Irish take a sixpoint lead after 33 minutes with

two 30-meter penalty goals by Mike Gibson, the first in tha 21st minute, But the Welsh hit back with a try, a dropped goal and a penalty in a five minute hlast to lead 9-6 at half-time and it was mostly one-way traffic in

the second half. Barry John accounted for 11 points for the Welshmen but missed several kicks that would have stretched the winning mar-

Gareth Edwards and Gerald Davies got two tries apiece for Wales who had managed only one victory in the last five previons encounters with Ireland. The tally after 74 internationals now stands at 44 victories for Wales, 26 for Ireland with four ties. RUGBY UNION STANDINGS

IOC Asks Eligibility

Revision in Rule May Aid Skiers

By Michael Katz

LAUSANNE, Switzerland, March 14 (NYT).—The future of Alpine skiing as an Olympic aport was not discussed directly, but may have been decided in its favor anyway tonight at an executive board meeting of the Interna-tional Olympic Committee. No ruling was made on the ten

skiers declared "ineligible" for the 1972 Winter Games by Avery Brundage, the IOC president, who said the matter was not discussed at the two-day meeting here. Inatead, the board proposed the formation of a special sub-committee to decide all sticky cases of amateur eligibility, More-over, it submitted for approval by all 75 IOC members s revision of Rule 26, the Olympic rule on eligibility on which, ultimately, the case of the ten skiers will

And though neither the proposed changes, which must be ap-proved by a two-thirds majority of the members, nor the makeup of the special subcommittee were announced, it seems probable that skiing will be part of the games at Sapporo, Japan,

Brundage, who has often declared Alpine skiing too commercial" to be allowed in the Olympics, said last November that ten skiers who took part in a commercial ski camp in Mammoth Mountain, Calif., were "in-eligible" for the games. The Fédération Internationale de Ski responded that if any of the ten wers barred, no skier—Alpine or Nordie—would participate in the Olympics.

Brundage said tonight that he had not changed his mind. But the formation of the special committee—which he said should have been done long ago—takes the matter out of his hands.

The Austrian girls, hadly heaten by the French in the early part of the aeason, dominated the The special committee of "three to five members." Brundage anevent with five girls among the nounced, would he picked by the top six today, Berni Rauter was executive board. And the executive fouorth in 1:21.57, Wiltrud Drexel board proved here that it had the fifth in 1:21.91 and Monica Kaserer sixth in 1:21.97. power to override the 83-year-old president's strict views on ama-For the French, it was another teurism. setback, Michele Jacot and Françoise Macchi, second and The membership is expected to

> changes in Rule 26 and the formation of the committee by a mail vote which should be tallied within a month. Brundage announced that the board's actions here were "twant-

follow the lead of the nine-man

executive board and suprove the

to 210 against 177 for last year's winner, Michele Jacot, and 133 for Isabelle Mir of France. mous." But that apparently gave him no pleasure "I'd hoped that the rules of the International Olympic Committee would be more severe than any [international sports] federation's," he said. "But my hopes were not realized. Some federations have more strict rules than

we have." Asked if he thought the new rules, when adopted, might mean "an erosion of amateurism," Brundage replied: "It was about the best we could do in the situation."

The "situation" is that the three vice-presidents-Lord Killinan of Ireland, Count Jean de Beaumont of France and Jonkheer Herman A. Van Karnebeek of the Netherlands—were able to convince Brundage at a meet-ing of the four that lasted until one o'clock this morning that

some liberalization was needed. And in that context, it would seem that the special subcommittee to rule on the case of the Mammoth Mountain ten will be amenable to the arguments of the FIS. The three vice-presidents, after a meeting last January with Marc Hodler, the FIS president, came away anparently convinced that the ten

skiers had not broken any rules. The subcommittee, which would have the power to "veto" the eligibility of any competitor it found to have broken Olympic rules, would work with the national: Olympic committees and international sports federations. A contestant'e entry for the games must be approved by these two organizations and, in those cases where either group had any dooht, it could turn over the problem to the special panel. In the case of Mammoth Mountain, Brundage said, "The dectsion would be on the camp, not on the individuals." And, he said, he would be willing to change his own mind if the investigation disclosed that the ten skiers indeed had not broken the

Observer

Militance, Anyone?

By Russell Baker

roster of new militant groups which have been formed in the past week:

• Lout Liberation—This is a movement aimed at restoring freedom of self-expression of

America's Louts, who have for years heen ruthlessly silenced and psychically mutliated by etlquette codes and misdemeanor status imposed

"polite establish-Baker ment. For imperialistic and genocidal reasons, the form of greeting used by Lout Libhers is a kick to the shins of the person being hailed. To attract public attention to their cause, Lout Lib members attend dinner parties and tell guests at the far end of the table that they ought to keep their mouths shut if they do not know what they are talking about. At the end of the evening they tell their hostess that the meal was miserable and that she ought to get a gew girdle.

· Grouch New-Grouch Now is n highly disciplined group of militants determined to wipe out the last traces of pleasantness in the American public place. Laughter, smiles and other repressive behavior signifying good spirits degrade the dignity of grouchhood and should not be allowed to go unanswered, according to Misanthrope's Manifesto, which calls for mass snarlins at the Washington Monument to dramatize the movement's demand for government-subsidized hellyaches.

• Free Our Necks-This is en extremely violent rump faction of RAMFAST (Radicals and Militants for a Skinnier Tier. RAM-FAST, it will be recalled, demands legislation requiring persons who wear fat necktles to sign an affidarit admitting that their intent is to intimidate and destroy the manhood of men who wear thin

neckties. Hate!—The oppressive character of the American system, say the founders of Hate!, has created a coercive psychology which makes Americans feel ashamed of

their hate except when they are

WASHINGTON.—Here is the hating people who do not live up to national love norms. Americans can never be free, Hatel contends, until every individual is granted the opportunity to hate for the pure joy of hating with-out being made to feel ngly and

> Scholars for a Simpler Society—Complexity, which has been built into Amirican life by men warmongers and the mating instinct, among other factors, has viciously destroyed the simplicity of life in this country today, S. S. S. declared at its founding convention last week. This complexity has been imposed on America by oppressors to enslave and exploit the simpla people for reasons far too complex for anybody to understand. S. S. S. calls for the immediate restoration of simplicity to American life, by destroying everything now standing if necessary, hut men, warmongers and the mating instinct without fail.

> ● Sadist's Liberation—No group in America is more maligned and abused thao our sadists. Such is the obloquy to which they are subjected that they rarely dare wear their whips, hat pins and tire chains in public for fear of receiving looks of slarm from socalled "straight" persons. Sadist'a Lib has scheduled a mass beating in Chicago pext month to dramatize its demand for changes in ancient repressive laws.

• The Movement for a More Meaningful Movement - This group is composed of persons who feel that they have been oppressed and deprived of their right to a significant radical militant movement they can fight for. The oppressors, they say, are all the other radical militant orovements, the goels of which, they say, are unmeaningful. All the other radical militant move-ments, they say, have been created by the system as part of the oppressor's scheme to divert the attention of exploited people from the fect that the only movement that can possibly be meaningful for mankind has still not been formed. The Movement for a More Meaningful Movement wants to find out what this move-

ment is, and form it. But first, it declares, all the other movements, as well as the country, must be destroyed.

They Didn't Laugh At Ro-Non-So-Te

By Rasz Gustaitis SAN FRANCISCO (WP).—His oname, he said was Ro-Non-So-Te, and his purpose to

provide press agent services "on behalf of all life forms of the earthly hiosphere." A couple of years ago, the notion might have seemed kooky to many of the newsmen who came to the official opening of Living Creatures Asso-

ciates at San Francisco's Ecology Center. They would have been inclined to dismiss Ro-Non-So-Te's new venture as faintly amusing—as they dismissed hirdwatchers, anti-vivisectionists and suchlike folk. But that was before the public became alarmed at the multiplicity of ecological catas-

trophes. Nobody snickered or made cracks as Ro-Non-So-Te spoke, standing in front of the cameras bushyhalred like an enormous hut friendly wild cat, dressed in workshirt and oiletained trousers, logging boots, eucalyptus pod necklace, roomy bush jacket. By attire, he was hard to categorize. His clients would include homo suplens he said, but only

rarely. Living creatures would concentrate on representing other life forms. There were words in behalf of the kit fox. the blue herons, American egrets and life forms of the Hopis' sacred Black Mess.

"As a concept, as a perspec-tive, we are at least three mil-lennia overdue," he had stated in a handsomely printed ansouncement "The present emer-gencies in the biosphere are preponderantly the result of man-centered thinking-or of no thinking at all. We shall counsel and promote habitat thinking, the beginnings of a flexible and informal partly intuitive rationality which will allow decisions to be made on the basis of all affected life forms simultaneously.

Living Creatures would try to direct newsmen to experts qualified to speak for different species, Ro-Non-So-Te said. "to people who can talk of whales, for instance, as whales rather than as part of a process called whaling." It would also try to show how man's in-

terests mesh with those of other life forms. A case in point was then presented by ecologist Sterling Bunnell, in behalf of the Sa Joaquin kit fox, a hig-eared brown animal the size of a large cat. It will prohably be extinct, Bunnell said. within the next five years when desert areas in the San Josquin Valley are irrigated through

The little fox is "extremely tame and unsuspecting." harmless to domestic animals and an excellent rodent catcher, he said.

the California Water Project. About 90 percent of its habitat

will then he destroyed.

As rodent controller, it is preferable to the poisons that are now dropped from planes and kill not only rats but also the animals that eat rats such as the kit fox, Refuges for the fox, he said, would also harbor wild bees that are hetter pollinators than domestic bees. "So the diversity would be beneficial for man. But when

Ro-Non-So-Te, press

agent for the earth.

Working in behalf of the whale, and the egret (left), and the Hopi Indian, and the blue heron, and "all life forms of the earthly biosphere."

we let short-term economic criteria determine what we do, we can't avoid destruction of our environment." Bunnell said. Clarence Zumwalt naturalist at the Audubon Canyon Ranch near Stinson Beach, then told of the plight of the American egrets which last year had fewer young because eggs were thin-shelled and they broke.

Five egrets that died unnaturally last year were exam-med, Zumwalt said. They were found to contain heavy concentrations of DDT, dieldrin and mercury. One source of the DDT had been located: a sewage outflow from a DDT factory south of Los Angeles.

Then Jack Loeffler, of the Central Clearing House in Santa Fe, N. M., spoke on behalf of the life forms of the Black Mesa, sacred Hopi lands in Arizons that are now being mined to fuel power plants that will provide electricity to urban centers as far away as Los Angeles. The plants will emit pollntants way beyond the levels permissible Dear most classes: anim large cities. Loeffler helieves air, grasses."

they will deal a fatal hlow to much of the Southwest's ecology. "We now have to weigh the life and death of the Southwest against Los Angeles' possible electricity needs." he said. Part of that life are the Hopi Indians. "Their whole tradition is oriented toward a sense of balance with nature. They regard themselves as stewards. But the Hopi tradition will fail. They cannot cope with what is happening in their back yard."

cently has been known as Keith Lampe, said he expects to he working with Indians. His new name was given to him hy the poet Blue Cloud. As Lampe, he was an activist for many years as a Veterans

for Peace in Vietnam, a founder of the Youth International Party (Yippies) and publisher of the radical ecology newsletter Earth Readout. Now he quotes poet Gary Snyder;
"The most revolutionary consciousness is to be found among the most ruthlessly exploited

classes: animals, trees, water,

become a "man, not just a goody-goody. All women admire strong man, but I don't preach that man should be a brute."

The American situation does Ro-Non-So-Te, who until renot prevail in Britain, Bierer noted, because men work more slowly, society is less competitive, and The Victorian Age still has
